II. INTRODUCTION

a. Risk Factors

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Kotak FMP Series 178 is only the name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.2,50,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

Scheme Specific Risk Factors

- a) Kotak FMP Series 178 will comprise of securities issued by central and state government as also debt & money market instruments issued by corporates as mentioned under the paragraph 'How will the Scheme allocate its assets'. All such securities will mature on or before maturity of the scheme. As the securities are held to maturity, the interest rate risk is significantly mitigated. The debt securities issued by the corporates do carry a credit risk as also the liquidity risk.
- b) The Scheme will invest entirely in Debt/ Money Market Instruments and Government securities. Liquidity in these investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities.
- c) Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry higher amount of risk than government securities. Further, even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds, which are AA rated.
- d) The Market Price of Kotak FMP Series 178 like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. Hence the price of the units is likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.

SPECIFIC RISKS IN DEBT MARKETS AND CAPITAL MARKETS

Investments in Financial Instruments are faced with the following kinds of risks.

Risks associated with Debt / Money Markets (i.e. Markets in which Interest bearing Securities or Discounted Instruments are traded)

a) Credit Risk:

Securities carry a Credit risk of repayment of principal or interest by the borrower. This risk depends on micro-economic factors such as financial soundness and ability of the borrower as also macro-economic factors such as Industry performance, Competition from Imports, Competitiveness of Exports, Input costs, Trade barriers, Favourability of Foreign Currency conversion rates, etc.

Credit risks of most issuers of Debt securities are rated by Independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes.

The highest credit rating (i.e. lowest credit risk) commands a low yield for the borrower. Conversely, the lowest credit rated borrower can raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers lenders prefer higher rated instruments further justifying the lower yields.

b) Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill.

Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Floating rate securities issued by a government (coupon linked to treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

c) Risk of Rating Migration:

The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.00% p.a., its market value would drop to Rs. 97.53 (i.e. 2.47%) If the security is up-graded to AAA category which commands a market yield of, say, 9.00% p.a. its market value would increase to Rs. 102.51 (i.e. by 2.51%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.

Rating	Yield (% p.a.)	Market Value (Rs.)
AA	10.00	100.00
If upgraded to AAA	9.00	102.51
If downgraded to A	11.00	97.53

d) Basis Risk:

During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve.

e) Spread Risk:

In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.

f) Reinvestment Risk:

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently the proceeds may get invested at a lower rate.

g) Liquidity Risk:

The corporate debt market is relatively illiquid vis-a- vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information (SAI).

Risk Associated with Investment in Derivatives Market

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investment. There are certain risks inherent in derivatives. These are:

- I. **Price Risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
- II. **Default Risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
- III. **Basis Risk** – This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset
- IV. **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
- V. **Liquidity risk** pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

b. Requirement of Minimum Investors in the Scheme

The Scheme and individual Plan(s) under the Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). These conditions will be complied with immediately after the close of the NFO itself i.e. at the time of allotment. In case of non-fulfillment with the condition of minimum 20 investors, the Scheme/Plan(s) shall be wound up in accordance with Regulation 39 (2) (c) of SEBI (MF) Regulations automatically without any reference from SEBI. In case of non-fulfillment with the condition of 25% holding by a single investor on the date of allotment, the application to the extent of exposure in excess of the stipulated 25% limit would be liable to be rejected and the allotment would be effective only to the extent of 25% of the corpus collected. Consequently, such exposure over 25% limits will lead to refund within 5 business days of the date of closure of the New Fund Offer.

III. INFORMATION ABOUT THE SCHEME

Kotak FMP Series 178

A. Type of the scheme:

Close ended debt scheme with maturity of 1099 days.

B. What is the investment objective of the scheme?

The investment objective of the Scheme is to generate returns through investments in debt and money market instruments with a view to reduce the interest rate risk. The Scheme will invest in debt and money market securities, maturing on or before maturity of the scheme.

There is no assurance that the investment objective of the Scheme will be achieved.

C. How will the scheme allocate its assets?

The asset allocation under the Scheme, under normal circumstances, will be as follows:

Investments	Indicative Allocation (% to net assets)		Risk Profile
	Minimum	Maximum	
Debt Securities (excluding money market instruments)	80%	100%	Low to Medium
Money Market instruments	0	20%	Low to Medium
Government Securities	0	20%	Low

Investment in Derivatives will be up to 50% of the net assets of the Scheme. The total gross exposure investment in debt + money market instruments + derivatives (fixed income) shall not exceed 100% of net assets of the Scheme.

The Scheme may take derivatives position (fixed income) based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the investment objective of the Scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy as permitted under SEBI (MF) Regulations from time to time.

The scheme will invest in repo of corporate debt securities.

Investment Committee shall from time to time decide the negative list of sectors where the scheme shall not take exposure. The schemes shall not invest in any debt instruments/papers issued by Micro finance companies, Airlines Companies, Gems and Jewellery and unrated debt instruments

The schemes shall also not undertake securities lending, short selling and shall not invest in securitised debt, ADR/GDR, foreign securities and in Credit Default Swaps

Portfolio Rebalancing:

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions may vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and only for defensive

considerations. In case of any deviation, the AMC will achieve a normal asset allocation pattern as within 30 days. Where the portfolio is not rebalanced within specified days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objective of the Scheme.

Intended Portfolio for Scheme

The intended Portfolio for the Schemes will be as under. The Scheme will ensure adherence to the floors and ceilings within a range of 5% of the intended allocation (in %) against each sub asset class/credit rating.

Instruments	Credit Rating					
	AAA	AA	A	A1+	BBB	Not Applicable
CDs	-	-	-	-	-	-
CPs	-	-	-	0 – 5 %	-	-
NCDs	-	95-100%	-	-	-	-
CBLO / T-Bills/Repo/Gsecs	-	-	-	-	-	-

Investment in Derivatives will be up to 50% of the net assets of the Scheme. The total gross exposure investment in debt + money market instruments + derivatives (fixed income) shall not exceed 100% of net assets of the Scheme.

The Scheme(s) may take derivatives position (fixed income) based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the investment objective of the Scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy as permitted under SEBI (MF) Regulations from time to time.

The scheme will invest in repo of corporate debt securities.

Investment Committee shall from time to time decide the negative list of sectors where the scheme shall not take exposure. The schemes shall not invest in any debt instruments/papers issued by Micro finance companies, Airlines Companies, Gems and Jewellery and unrated debt instruments

The schemes shall also not undertake securities lending, short selling and shall not invest in securitised debt, ADR/GDR, foreign securities and in Credit Default Swaps

Notes:-

- Securities with Rating AA will include AA+ and AA-. Similarly, securities with Rating A will include A+ and A- .
- Positive variation in investment towards higher credit rating in the same instrument is allowed. In case of non availability of assets or taking into account the risk reward analysis of CPs/NCDs the scheme may invest in CDs having highest rating (A1+) & CBLOs/T Bills. Such deviation may exist till suitable NCD/CP of desired credit quality is not available. At the time of building of portfolio post NFO and just towards maturity, there may be higher allocation to cash and cash equivalents under each series of the scheme
- All investments shall be made based on the ratings prevalent at the time of investments. However where there are dual ratings for a particular security, most conservative publicly available rating shall be considered.

- d. In the event of any deviations below the minimum limits or beyond the maximum limits, rebalancing of the asset allocation will be called for by the Fund Manager within the 30 days from the date of the said deviation. Such changes in the investment pattern will be for a short term and for defensive considerations and the intention being at all times to seek to protect the interests of the Unit Holders.
- e. Investment Committee shall from time to time decide the negative list of sectors where the scheme shall not take exposure. The schemes shall not invest in any debt instruments/papers issued by Micro finance companies, Airlines Companies, Gems and Jewellery and unrated debt instruments
- f. The schemes shall also not undertake securities lending, short selling and shall not invest in ADR/GDR, foreign securities and in Credit Default Swaps.

There will be no variation between intended portfolio allocation and the final portfolio allocation except to the exception as mentioned in point (b) and (d) above.

Credit Evaluation Policy

The AMC has appointed an Investment Committee which oversees matters relating to credit assessments and approvals. The Investment Committee comprises of Senior Executives of the Company including a Director. It oversees the risk management function and sets the framework for credit risk assessment and monitoring, sectoral exposure caps, sensitive sector limits, fund level limits and norms for investment decision-making. This investment policy which emphasizes on credit quality, liquidity and duration management lays down the process to be followed by the debt fund management team while making investments. The broad process followed can be enlisted as under:

- Detailed credit research is undertaken for each investment in the portfolio which includes qualitative and quantitative assessment of various issuers.
- Qualitative assessment involves analyzing the business profile of the issuer on several parameters including market share, competitive positioning, management quality, business diversification, regulatory environment, rating agency views and event risk if any.
- Quantitative assessment involves analyzing the financial profile of the issuer on parameters like balance sheet size, cash flow adequacy, debt servicing capability, working capital requirements, funding flexibility and capital adequacy.
- Typical ratios used in credit analysis are debt to equity (leverage), short term debt to total debt, interest coverage ratio, total debt to EBITDA, current ratio, EBITDA margin and net profit margin.
- To ascertain exposure limits on the issuer, we consider the total debt outstanding for the entity and apply a certain percentage based on our internal grading criteria. The same is also restricted to a certain percentage of our own debt net assets. The investment limits so derived are strictly adhered to.

Overview of Debt Market and Money Markets

The Indian Debt Market has grown in size substantially over the years. The Reserve Bank of India has been taking steps to make the Indian Debt Market efficient and vibrant. Broadly, the debt market is divided in two parts viz. the Money Market and the Debt market. Money market instruments have a tenor of less than one year while debt market instruments have a tenor of more than one year. Money market instruments are typically commercial paper, certificates of deposit, treasury bills, trade bills, repos, interbank call deposit receipts etc. Debt market comprises typically of securities issued by Governments (Central and State), Banks, Financial Institutions, and Companies in the private and public sector, Corporations, Statutory Bodies etc.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an

agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and nongovernment debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

- Overnight Call
- Collateralised Borrowing & Lending Obligations (CBLO)
- Repo/Reverse Repo Agreement
- Treasury Bills
- Government securities with a residual maturity of < 1 year.
- Commercial Paper
- Certificate of Deposit

The debt securities are mainly traded over the telephone directly or through brokers. The National Stock Exchange of India has a separate trading platform called the Wholesale Debt Market segment where trades put through member brokers are reported.

RBI has introduced the Negotiated Dealing System (NDS) platform for screen-based trading in Government Securities and Money Market instruments. Most of the market participants are now operating through NDS.

Promoted by major banks and financial institutions, The Clearing Corporation of India Ltd. (CCIL) was incorporated on April 30, 2001. The CCIL guarantees the settlement of all trades executed through NDS. The clearing and settlement risks viz., Counter party Credit Risk and Operational Risk are mitigated by CCIL thereby facilitating a smooth settlement process.

The following table gives approximate yields prevailing as on July 12, 2017 on some of the money and debt market instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing.

Instrument	Yield Range (% per annum)
Inter-bank Call Money	6.20 - 6.25
91 Day Treasury Bill	6.18 – 6.20
364 Day Treasury Bill	6.30 – 6.32
P1+ Commercial Paper 90 Days	6.30 – 6.33
3-Year Government of India Security	6.45 – 6.50
5-Year Government of India Security	6.50 – 6.55
10-Year Government of India Security	6.40 – 6.45

Generally, for instruments issued by a non-Government entity, the yield is higher than the yield on a Government Security with corresponding maturity. The difference, known as credit spread, depends on the credit rating of the entity. Investors must note that the yields shown above are the yields prevailing on July 12, 2017 and they are likely to change consequent to changes in economic conditions and RBI policy.

D. Where will the scheme invest?

The amount collected under the scheme will be invested only in debt and money market instruments and government securities. Subject to the Regulations, the amount collected under this scheme can be invested in any (but not exclusively) of the following securities/ debt instruments:

- a) Securities created and issued by the Central and State Governments and repo/or reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- b) Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- c) Debt securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee
- d) Corporate debt (of both public and private sector undertakings).
- e) Securities/ Term Deposits of banks (both public and private sector) and development financial institutions
- f) Money market instruments permitted by SEBI/RBI, having maturities of up to one year or in alternative investment for the call money market as may be provided by the RBI to meet the liquidity requirements.
- g) Certificate of Deposits (CDs).
- h) Commercial Paper (CPs). A part of the net assets may be invested in the Collateralised Borrowing & Lending Obligations (CBLO) or in an alternative investment as may be provided by RBI to meet the liquidity requirements.
- i) Repo of corporate debt securities
- j) The non-convertible part of convertible securities.
- k) Any other domestic fixed income securities as permitted by SEBI / RBI from time to time.
- l) Derivative instruments like Interest Rate Swaps, Interest Rate Futures, Forward Rate Agreements and such other derivative instruments permitted by SEBI/RBI.

The securities/debt instruments mentioned above could be listed or unlisted, secured or unsecured, rated and of varying maturities and other terms of issue. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offer or negotiated deals. The Schemes may also enter into repurchase and reverse repurchase obligations in government securities held by it as per guidelines/regulations applicable to such transactions.

Interest Rate Swap (IRS)

IRS is a widely used derivative product in the financial markets to manage interest rate risk. A typical transaction is a contract to exchange streams of interest rate obligation/income on a notional principle amount with a counter party, usually a bank. The two interest streams are, fixed rate on one side and floating rate on the other.

Example: Suppose the Fund holds a fixed rate bond of maturity 5 years carrying a fixed interest rate (coupon) of 9% p.a. payable half yearly. Such an investment runs the risk of depreciation if interest rates rise. To manage this risk, the Fund can enter into an IRS with another market participant, here the Fund contracts to pay fixed rate, say 8.25% p.a., and receive a floating rate (say overnight MIBOR). This transaction is done for a notional principal amount equal to the value of the investment. By such a contract a fixed rate income is offset by a fixed rate payment obligation leaving only a floating rate income stream. Thus, without actually investing in a floating rate asset, the Fund starts earning a floating rate income, reducing the risk of depreciation associated with the fixed rate investment. Following table summarises the cash flow streams:

Original investment	9% p.a.
Pay (Fixed rate)	8.25% p.a. (IRS)
Receive (Floating rate)	MIBOR
Net Flow	MIBOR + 0.75% p.a. (*)

* (9% p.a. – 8.25 % p.a.)

The floating rate reference is defined in the swap agreement. The above example illustrates a case of fixed to floating rate swap. A swap could be done to move from floating rate to fixed rate in a similar fashion.

Please note that the above example is hypothetical in nature and the interest rates are assumed. The actual return may vary based on actual and depends on the interest rate prevailing at the time the swap agreement is entered into.

Interest Rate Futures (IRFs)

Interest Rate Futures (IRF) contract is an agreement to buy or to sell a debt instrument at a specified future date at a price that is fixed today. Exchange traded IRFs are standardised contracts based on a notional coupon bearing Government of India (GOI) security. National Securities Clearing Corporation Limited (NSCCL) is the clearing and settlement agency for all deals executed in Interest Rate Futures. NSCCL acts as legal counter-party to all deals on Interest Rate Futures contract and guarantees settlement.

Using IRFs

- **Directional trading**

As there is an inverse relationship between interest rate movement and underlying bond prices, the futures price also moves in tandem with the underlying bond prices. If one has a strong view that interest rates will rise in the near future and wants to benefit from rise in interest rates; one can do so by taking short position in IRF contracts.

Example:

A trader expects long-term interest rate to rise. He decides to sell Interest Rate Futures contracts as he shall benefit from falling future prices.

Expectation	Position
Interest Rates going up	Short Futures
Interest Rates going down	Long Futures

- Trade Date- 1st April 2017
- Futures Delivery date – 1st May 2017
- Current Futures Price- Rs. 97.50
- Futures Bond Yield- 8.21%
- Trader sell 250 contracts of the May 2017 - 10 Year futures contract on NSE on 1st April 2017 at Rs. 97.50

Assuming the price moves to Rs. 97.15 on April 9, 2017, net MTM gain would be Rs. 1,75,000 (250*2000*97.50-97.15) (I)

Closing out the Position

- 10th April 2017 - Futures market Price – Rs. 96.70
- Trader buys 250 contracts of May 2017 at Rs. 96.70 and squares off his position
- Therefore total profit for trader 250*2000*(97.15-96.70) is Rs.2,25,000 (II)
- Total Profit on the trade = INR 4,00,000 (I & II)

Hedging

Holders of the GOI securities are exposed to the risk of rising interest rates, which in turn results in the reduction in the value of their portfolio. So in order to protect against a fall in the value of their portfolio due to falling bond prices, they can take short position in IRF contracts.

Example:

Date: 01-April-2017

Spot price of GOI Security: Rs 105.05

Futures price of IRF Contract: Rs 105.12

On 01-April-2017 XYZ bought 2000 GOI securities from spot market at Rs 105.07. He anticipates that the interest rate will rise in near future. Therefore to hedge the exposure in underlying market he may sell May 2017 Interest Rate Futures contracts at Rs 105.12

On 16-May-2017 due to increase in interest rate:

Spot price of GOI Security: Rs 104.24

Futures Price of IRF Contract: Rs 104.28

Loss in underlying market will be $(104.24 - 105.05) * 2000 = \text{Rs } 1620$

Profit in the Futures market will be $(104.28 - 105.12) * 2000 = \text{Rs } 1680$

Arbitrage

Arbitrage is the price difference between the bonds prices in underlying bond market and IRF contract without any view about the interest rate movement. One can earn the risk-less profit from realizing arbitrage opportunity and entering into the IRF contract.

Example:

On 18th April, 2017 buy 6.35% GOI '20 at the current market price of Rs. 97.2485

Step 1 - Short the futures at the current futures price of Rs. 97.80

Step 2 - Fund the bond by borrowing up to the delivery period (assuming borrowing rate is 8.00%)

Step 3 - On 10th May 2017, give a notice of delivery to the exchange

Under the strategy, the trader has earned a return of

$$= (97.800 - 97.2485) / 97.2485 * 365 / 23$$

$$= 9.00 \% \text{ (implied repo rate)}$$

(Note: For simplicity accrued interest is not considered for calculation)

Against its funding cost of 8.00% (borrowing rate), thereby earning risk free arbitrage.

As per SEBI circular no. Cir / IMD / DF / 11 / 2010 dated August 18, 2010 on "Review of norms for investment and disclosure by Mutual Funds in derivatives", the limits for exposure towards derivatives are as under:

1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following :-
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.

- d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.

E. What are the investment strategies?

For the purpose of achieving the investment objective, the Scheme will invest in a portfolio of Debt and Money Market securities, maturing on or before maturity of the Scheme.

The AMC has an internal policy for selection of assets of the portfolio. The portfolio is constructed taking into account ratings from different rating agencies, rating migration, credit premium over the price of a sovereign security, general economic conditions and such other criteria. Such an internal policy from time to time lays down maximum/minimum exposure for different ratings, liquidity norms, and so on. Through such norms, the Scheme is expected to maintain a high quality portfolio and manage credit risk well.

Investments may be made in instruments, which, in the opinion of the Fund Manager, are of an acceptable credit risk and chance of default is minimum. The Fund Manager will generally be guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio.

Risk Control Measures for investment strategy

Investments made from the scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations / circulars. The AMC will strive to achieve the investment objective by way of a judicious portfolio mix comprising of debt, money market instruments and government securities, within the asset allocation pattern indicated in the SID. Every investment opportunity would be assessed with regard to credit risk, interest rate risk and liquidity risk.

The internal systems have all the SEBI limits incorporated. This ensures that all limits are tracked at the entry stage itself. The system has the capability to alert certain deals that require special attention in case they are beyond certain prescribed parameters. The deals then cannot proceed further without the approval of the appropriate authority. Thus checks are in place to ensure no breach of limit occurs.

Portfolio Turnover:

Since the scheme is close-ended scheme, the portfolio turnover ratio is expected to be low.

F. Fundamental attributes

Following are the fundamental attributes of the scheme, in terms of Regulation 18 (15A) of SEBI (MF) Regulations:

1. Type of the scheme: As mentioned under the heading "Type of Scheme"
2. Investment Objective: As mentioned under the heading "Investment Objective"
3. Investment Pattern: As mentioned under the heading "How will the scheme allocate its assets"

4. Terms of Issue:

- a. Liquidity provisions such as listing, repurchase, redemption. Investors may refer Chapter IV for detailed information on listing, repurchase and redemption.
- b. Aggregate fees and expenses charged to the scheme. Investors may refer Chapter V on fees and expenses charged to the scheme.
- c. Any safety net or guarantee provided.- Not Applicable

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme and the Plan / Option thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme and the Plan / Option thereunder and affect the interests of Unitholders is carried out unless:

- A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load

G. How will the scheme benchmark its performance?

The Benchmark index of the Scheme will be CRISIL Composite Bond Fund Index

The Trustee reserves right to change benchmark in future for measuring performance of the scheme.

H. Who manages the scheme(s)?

Mr. Deepak Agarwal will be the fund manager for the scheme.

 - b. any security issued by way of private placement by an associate or group company of the Sponsors; or
 - c. the listed securities of group companies of the Sponsors which is in excess of 25% of the net assets.
5. The Scheme shall not invest in any Fund of Funds Scheme.
6. Transfer of investments from one scheme to another scheme in the same Mutual Fund, shall be allowed only if:-
 - a. such transfers are made at the prevailing market price for quoted Securities on spot basis (spot basis shall have the same meaning as specified by Stock Exchange for spot transactions.)
 - b. the securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.
7. The Mutual Fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities:
 - a. Provided further that the Mutual Fund may enter into derivatives transactions in a recognized stock exchange, subject to the framework specified by SEBI.

- b. Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the Reserve Bank of India in this regard.
8. No loans for any purpose may be advanced by the Mutual Fund and the Mutual Fund shall not borrow except to meet temporary liquidity needs of the Scheme for the purpose of payment of interest or dividends to Unit Holders, provided that the Mutual Fund shall not borrow more than 20% of the net assets of each of the Schemes and the duration of such borrowing shall not exceed a period of six months.
9. The Mutual Fund shall enter into transactions relating to Government Securities only in dematerialised form.
10. The mutual fund shall get the securities purchased / transferred in the name of the fund on account of the concerned scheme, where investments are intended to be of long term nature.
11. Pending deployment of funds of a scheme in terms of investment objectives of the scheme, a mutual fund may invest them in short term deposits of schedule commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as may be amended from time to time. The AMC shall not charge any Investment management and advisory fees for parking of funds in such short term deposits of scheduled commercial banks, for the Scheme.
12. The Scheme shall invest only in such securities which mature on or before the date of the maturity of the Scheme in accordance to SEBI Circular No. SEBI/IMD/ CIR No. 12/147132/08 dated December 11, 2008.
13. Investments in Fixed Income Derivatives shall be in accordance with the guidelines as stated under SEBI circular no Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010, as may be amended from time to time.
14. In accordance with SEBI circular no. CIR/IMD/DF/21/2012 dated September 13, 2012, CIR/IMD/DF/24/2012 dated November 19, 2012, SEBI circular no. SEBI/HO//DF2/CIR/P/2016/35 dated February 15, 2016, SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2016/68 dated August 10, 2016 and SEBI/HO/IMD/DF2/CIR/P/2017/14 dated February 22, 2017 in case of debt schemes, the total exposure to single sector shall not exceed 25% of the net assets of the scheme. However this limit is not applicable for investments in Bank CDs, CBLO, G-Secs, T-Bills short term deposits of scheduled commercial banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks.

Provided that an additional exposure to financial services sector (over and above the limit of 25%) not exceeding 15% of the net assets of the scheme shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) only;

Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of

Trustees

For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 (Regulations) and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

The AMC may alter these above stated restrictions from time to time to the extent the SEBI (MF) Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective. The Trustee may from time to time alter these restrictions in conformity with the SEBI (MF) Regulations.

All investment restrictions shall be applicable at the time of making investment.

Apart from the above investment restrictions, the Fund follows certain internal norms vis-à-vis limiting exposure to scrips, sectors etc, within the above mentioned restrictions, and these are subject to review from time to time

Modifications, if any, in the Investment Restrictions on account of amendments to the Regulations shall supercede/override the provisions of the Trust Deed.

Participation of schemes of Kotak Mahindra Mutual Fund in repo of corporate debt securities:

In accordance with SEBI circular no. CIR / IMD / DF / 19 / 2011 dated November 11, 2011 and CIR/IMD/DF/23/2012 dated November 15, 2012; schemes of Kotak Mahindra Mutual Fund (KMMF) shall participate in the corporate bond repo transactions w.e.f. June 21, 2013 as per the guidelines issued by Reserve Bank of India (RBI) from time to time. Currently the applicable guidelines are as under:

- The gross exposure of the scheme to repo transactions in corporate debt securities shall not be more than 10 % of the net assets of the concerned scheme.
- The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt and derivatives shall not exceed 100% of the net assets of the concerned scheme.
- Mutual Funds shall participate in repo transactions only in AA and above rated corporate debt securities.
- In terms of Regulation 44 (2) mutual funds shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months

The investment restrictions applicable to the Scheme's participation in the corporate bond repos will also be as prescribed or varied by SEBI or by the Board of Kotak Mahindra Trustee Company Limited (subject to SEBI requirements) from time to time.

The following guidelines shall be followed by Kotak Mutual Fund for participating in repo in corporate debt securities, which have been approved by the Board of AMC and Trustee Company.

(i) Category of counterparty to be considered for making investment:

All entities eligible for transacting in corporate bond repos as defined by SEBI and RBI shall be considered for repo transactions.

(ii) Credit rating of counterparty to be considered for making investment

The schemes shall participate in corporate bond repo transactions with only those counterparties who have a credit rating of AA- and higher. In case there is no rating available, the Investment

Committee will decide the rating of the counterparty and report the same to the Board from time to time.

(iii) Tenor of Repo and collateral

As a repo seller, the schemes will borrow cash for a period not exceeding 6 months or as per extant regulations. As a repo buyer, the Schemes are allowed to undertake the transactions for maximum maturity upto one year or such other terms as may be approved by the Investment Committee. There shall be no restriction / limitation on the tenor of collateral.

(iv) Applicable haircuts

As per RBI circular RBI/2012-13/365 IDMD.PCD. 09 /14.03.02/2012-13 dated 07/01/2013, all corporate bond repo transaction will be subject to a minimum haircut given as given below:

(1) AAA	: 07.50%
(2) AA+	: 08.50%
(3) AA	: 10.00%

The haircut will be applicable on the prevailing market value of the said security on the prevailing on the date of trade. However, the fund manager may ask for a higher haircut (while lending) or give a higher haircut (while borrowing) depending on the market prevailing liquidity situation.

Risk envisaged and mitigation measures for repo transactions:

Credit risks could arise if the counterparty does not return the security as contracted or interest received by the counter party on due date. This risk is largely mitigated, as the choice of counterparties is largely restricted and their credit rating is taken into account before entering into such transactions. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to us. Thus the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

D. Computation of NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

The Fund shall value its investments according to the valuation norms, as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

NAV of Units under the Scheme will be calculated as shown below:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current assets including Accrued Income} - \text{Current Liabilities and provisions including accrued expenses}}{\text{No. of Units outstanding under the Scheme/Option.}}$$

NAV for the Scheme and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto four decimals.

Computation of NAV will be done after taking into account dividends declared, if any, and the distribution tax thereon, if applicable. The income earned and the profits realized in respect of the Units remain invested and are reflected in the NAV of the Units.

V. FEES AND EXPENSES

This section outlines the expenses that will be charged to the scheme.

New Fund Offer (NFO) expenses

These expenses are incurred for the purpose of various activities related to the NFO like marketing and advertising, Brokerage, registrar expenses, printing and stationary, bank charges etc.

The New Fund Offer expenses of the scheme will be borne by the AMC.
