II. INTRODUCTION

A Risk Factors

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Kotak Mahindra Bond Unit Scheme 99 is only the name of the scheme, and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.2,50,000 made by it towards setting up the Fund.
- The above mentioned scheme is not guaranteed or assured return scheme.

Scheme Specific Risk Factors

The Portfolio of Kotak Bond will comprise predominantly of Debt and Money Market instruments issued by Corporates, and to a lesser extent those issued by Central or State Governments. As such, there would be Moderate Credit Risk. Since upto 90% of the portfolio may be invested in securities maturing more than one year, there would be moderate to high Price-risk or Interest-rate risk.

Risks associated with Debt / Money Markets i.e. Markets in which Interest bearing Securities or Discounted Instruments are traded

(i) Credit Risk / Repayment Risk:

Securities carry a Credit risk of repayment of principal or interest by the borrower. This risk depends on micro-economic factors such as financial soundness and ability of the borrower as also macro-economic factors such as Industry performance, Competition from Imports, Competitiveness of Exports, Input costs, Trade barriers, Favourability of Foreign Currency conversion rates, etc.

Credit risks of most issuers of Debt securities are rated by Independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes.

The highest credit rating (i.e. lowest credit risk) commands a low yield for the borrower. Conversely, the lowest credit rated borrower can raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers lenders prefer higher rated instruments further justifying the lower yields.

(ii) Sovereign risk:

The Federal Government of a country (i.e. Central Govt. in case of India) is the issuer of the local currency in that country. The Government raises money to meet its Capital and Revenue expenditure by issuing Debt or Discounted Securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such Sovereign credit is near zero and is popularly known as "risk-free security" or "Zero-Risk security". Thus Zero-Risk is the lowest risk, even lower than a security with "AAA" rating and hence commands a yield, which is lower than a yield on "AAA" security.

(iii) Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill.

Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Floating rate securities issued by a government (coupon linked to Treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

(iv) Risk of Rating Migration:

The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.50% p.a., its market value would drop to Rs. 98.76 (i.e. 1.24%) If the security is up-graded to AAA category which commands a market yield of, say, 9.60% p.a. its market value would increase to Rs103.48 (i.e. by 3.48%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.

Rating	Yield (% p.a.)	Market Value (Rs.)
AA	11.00	100.00
If upgraded to AAA	9.60	103.48
If downgraded to A	11.50	98.76

(v) Basis Risk:

During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve.

(vi) Spread Risk:

In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.

(vii) Reinvestment Risk:

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently the proceeds may get invested at a lower rate.

(viii) Liquidity Risk:

The corporate debt market is relatively illiquid vis-a- vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described elsewhere in the SAI. The approval from the AMC Board and the Trustees giving details of circumstances and justification for the proposed action shall also be informed to SEBI in advance.

(ix) Risk Associated with Investment in Derivatives Market

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investment.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. There are certain risks inherent in derivatives. These are:

- a. **Price Risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
- b. **Default Risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
- c. **Basis Risk** – This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset
- d. **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
- e. **Liquidity risk** pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.
- f. The risk related to hedging for use of derivatives, (apart from the derivatives risk mentioned above) is that event of risk, which we were anticipating and hedged our position to mitigate it, does not happen. In such case, the cost incurred in hedging the position would be a avoidable charge to the scheme net assets.

(x) Potential Loss associated with Derivative Trading pertaining to Debt Markets

The use of an Interest Rate Swap ('IRS') does not eliminate the credit (default) risk on the original investment. While the fixed to floating rate IRS reduces interest rate risk caused by rise in interest rates, it also restricts the profit in case interest rates decline. In case of a floating to fixed rate swap, any subsequent rise in interest rates will result in a loss like in any fixed rate investment. Any IRS carries, the risk of default of the

counter party to the swap, which may lead to a loss. Such loss is usually, a small proportion of the notional principal amount of the swap.

(xi) Risks associated with Securitised Debt:

The Scheme may from time to time invest in domestic securitised debt, for instance, in asset backed securities (ABS) or mortgage backed securities (MBS). Typically, investments in securitised debt carry credit risk (where credit losses in the underlying pool exceed credit enhancement provided, (if any) and the reinvestment risk (which is higher as compared to the normal corporate or sovereign debt). The underlying assets in securitised debt are receivables arising from automobile loans, personal loans, loans against consumer durables, loans backed by mortgage of residential / commercial properties, underlying single loans etc.

ABS/MBS instruments reflect the proportionate undivided beneficial interest in the pool of loans and do not represent the obligation of the issuer of ABS/MBS or the originator of the underlying receivables. Investments in securitised debt is largely guided by following factors:

- Attractive yields i.e. where securitised papers offer better yields as compared to the other debt papers and also considering the risk profile of the securitised papers.
- Diversification of the portfolio
- Better performance

Broadly following types of loans are securitised:

a) Auto Loans

The underlying assets (cars etc.) are susceptible to depreciation in value whereas the loans are given at high loan to value ratios. Thus, after a few months, the value of asset becomes lower than the loan outstanding. The borrowers, therefore, may sometimes tend to default on loans and allow the vehicle to be repossessed.

These loans are also subject to model risk i.e. if a particular automobile model does not become popular, loans given for financing that model have a much higher likelihood of turning bad. In such cases, loss on sale of repossession vehicles is higher than usual.

Commercial vehicle loans are susceptible to the cyclicity in the economy. In a downturn in economy, freight rates drop leading to higher defaults in commercial vehicle loans. Further, the second hand prices of these vehicles also decline in such economic environment.

b) Housing Loans

Housing loans in India have shown very low default rates historically. However, in recent years, loans have been given at high loan to value ratios and to a much younger borrower classes. The loans have not yet gone through the full economic cycle and have not yet seen a period of declining property prices. Thus the performance of these housing loans is yet to be tested and it need not conform to the historical experience of low default rates.

c) Consumer Durable Loans

The underlying security for such loans is easily transferable without the bank's knowledge and hence repossession is difficult.

The underlying security for such loans is also susceptible to quick depreciation in value. This gives the borrowers a high incentive to default.

d) Personal Loans

These are unsecured loans. In case of a default, the bank has no security to fall back on. The lender has no control over how the borrower has used the borrowed money.

Further, all the above categories of loans have the following common risks:

All the above loans are retail, relatively small value loans. There is a possibility that the borrower takes different loans using the same income proof and thus the income is not sufficient to meet the debt service obligations of all these loans.

In India, there is no ready database available regarding past credit record of borrowers. Thus, loans may be given to borrowers with poor credit record. In retail loans, the risks due to frauds are high.

e) Single Loan PTC

A single loan PTC is a securitization transaction in which a loan given by an originator (Bank/ NBFC/ FI etc.) to a single entity (obligor) is converted into pass through certificates and sold to investors. The transaction involves the assignment of the loan and the underlying receivables by the originator to a trust, which funds the purchase by issuing PTCs to investors at the discounted value of the receivables. The PTCs are rated by a rating agency, which is based on the financial strength of the obligor alone, as the PTCs have no recourse to the originator.

The advantage of a single loan PTC is that the rating represents the credit risk of a single entity (the obligor) and is hence easy to understand and track over the tenure of the PTC. The primary risk is that of all securitized instruments, which are not traded as often in the secondary market and hence carry an illiquidity risk. The structure involves an assignment of the loan by the originator to the trustee who then has no interest in monitoring the credit quality of the originator. The originator that is most often a bank is in the best position to monitor the credit quality of the originator. The investor then has to rely on an external rating agency to monitor the PTC. Since the AMC relies on the documentation provided by the originator, there is a risk to the extent of the underlying documentation between the seller and underlying borrower.

B. Requirement of minimum investors in the scheme

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. Special Considerations

- Prospective investors should review/study SAI along with SID carefully and in its entirety and shall not construe the contents hereof or regard the summaries contained herein as advice relating to legal, taxation, or financial/investment matters and are advised to consult their own professional advisor(s)

as to the legal or any other requirements or restrictions relating to the subscriptions, gifting, acquisition, holding, disposal (sale, transfer, switch or redemption or conversion into money) of units and to the treatment of income (if any), capitalization, capital gains, any distribution, and other tax consequences relevant to their subscription, acquisition, holding, capitalization, disposal (sale, transfer, switch or redemption or conversion into money) of units within their jurisdiction/nationality, residence, domicile etc. or under the laws of any jurisdiction to which they or any managed Funds to be used to purchase/gift units are subject, and also to determine possible legal, tax, financial or other consequences of subscribing/gifting to, purchasing or holding units before making an application for units.

- Neither this SID and SAI, nor the units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or subject to registration and accordingly, any person who gets possession of this SID is required to inform themselves about, and to observe, any such restrictions. It is the responsibility of any persons in possession of this SID and any persons wishing to apply for units pursuant to this SID to inform themselves of and to observe, all applicable laws and Regulations of such relevant jurisdiction. Any changes in SEBI/NSE/RBI regulations and other applicable laws/regulations could have an effect on such investments and valuation thereof.
- Kotak Mahindra Mutual Fund/AMC has not authorised any person to give any information or make any representations, either oral or written, not stated in this SID in connection with issue of units under the Scheme. Prospective investors are advised not to rely upon any information or representations not incorporated in the SAI and SID as the same have not been authorised by the Fund or the AMC. Any purchase or redemption made by any person on the basis of statements or representations which are not contained in this SID or which are not consistent with the information contained herein shall be solely at the risk of the investor. The investor is requested to check the credentials of the individual, firm or other entity he/she is entrusting his/her application form and payment to, for any transaction with the Fund. The Fund shall not be responsible for any acts done by the intermediaries representing or purportedly representing such investor.
- If the units are held by any person in breach of the Regulations, law or requirements of any governmental, statutory authority including, without limitation, Exchange Control Regulations, the Fund may mandatorily redeem all the units of any Unit holder where the units are held by a Unit holder in breach of the same. The Trustee may further mandatorily redeem units of any Unit holder in the event it is found that the Unit holder has submitted information either in the application or otherwise that is false, misleading or incomplete.
- If a Unit holder makes a redemption request immediately after purchase of units, the Fund shall have a right to withhold the redemption request till sufficient time has elapsed to ensure that the amount remitted by the Unit holder (for purchase of units) is realized and the proceeds have been credited to the Scheme's Account. However, this is only applicable if the value of redemption is such that some or all of the freshly purchased units may have to be redeemed to effect the full redemption.
- In terms of the Prevention of Money Laundering Act, 2002 ("PMLA") the rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering (AML) Laws, all intermediaries, including mutual funds, are required to formulate and implement a client identification programme, and to verify and maintain the record of identity and address(es) of investors.
- If after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, the AMC shall report any such suspicious transactions to competent authorities under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI, furnish any such information in connection therewith to such authorities and take any other actions as may be required for the purposes of fulfilling its obligations under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI without obtaining the prior approval of the investor/Unit holder/any other person.

Purchase/ Redemption of units of schemes of Kotak Mahindra Mutual Fund through Stock Exchange Infrastructure

- Kotak Mahindra Asset Management Company Limited (KMAMC) offers an alternate transaction platform to facilitate purchase/redemption of units in Demat form of certain schemes of Kotak Mahindra Mutual Fund on Mutual Fund Service System (MFSS) of the National Stock Exchange India Limited (NSE) and on the BSE Stock Exchange Platform for Allotment and Repurchase of

Mutual Funds (BSE StAR MF System) of the Bombay Stock Exchange (BSE). KMAMC has entered into an arrangement with NSE & BSE for facilitating transactions in select Kotak Mahindra Mutual Fund schemes through the stock exchange brokers who are AMFI Certified.

- Unit holders, both existing and new, having a demat account can only participate through this facility. However, switch transactions, SWP, STP are currently not available under this facility. Switch Transactions are permitted only BSE StarMF platform.
- MFSS and BSE StAR MF are electronic platforms introduced by National Stock Exchange (NSE) & Bombay Stock Exchange (BSE) respectively for transacting in units of mutual funds. The units of eligible Schemes are not listed on NSE & BSE and the same cannot be traded on the Stock Exchange like shares. The window for purchase/redemption of units on MFSS and BSE StAR MF will be available between 9 a.m. and 3 p.m. or such other timings as may be intimated by the exchanges. II. INFORMATION ABOUT THE SCHEME

Kotak Mahindra Bond Unit Scheme 99

A. Type of Scheme

An Open Ended Debt Scheme

B. Features of the scheme (Investment Objective, Asset Allocation Pattern, Investment Strategy, Benchmark, Risk Mitigation)

Investment Objective	<p>The investment objective of the Scheme is to create a portfolio of debt instruments such as bonds, debentures, Government Securities and money market instruments, including repos in permitted securities of different maturities, so as to spread the risk across a wide maturity horizon and different kinds of issuers in the debt markets. The Scheme may invest in call money / term money market in terms of RBI guidelines in this respect.</p> <p>To reduce the risk of the portfolio, the Scheme may also use various derivative and hedging products from time to time, in the manner permitted by SEBI.</p> <p>Subject to the maximum amount permitted from time to time, the Scheme may invest in offshore securities in the manner allowed by SEBI / RBI provided such investments are in conformity with the investment objective of the Scheme and the prevailing guidelines and Regulations.</p> <p>There is no assurance that the investment objective of the Scheme will be achieved.</p>									
Asset Allocation	<p>The asset allocation under the Scheme, under normal circumstances, is as follows:</p> <table border="1" data-bbox="459 1176 1398 1451"> <thead> <tr> <th data-bbox="459 1176 874 1243">Investments</th> <th data-bbox="882 1176 1145 1243">Indicative Allocation</th> <th data-bbox="1153 1176 1398 1243">Risk Profile</th> </tr> </thead> <tbody> <tr> <td data-bbox="459 1249 874 1350">* Debt Instruments with maturity more than one year</td> <td data-bbox="882 1249 1145 1350">25% to 100%</td> <td data-bbox="1153 1249 1398 1350">Medium</td> </tr> <tr> <td data-bbox="459 1357 874 1451">* Debt and Money Market instruments with maturity less than one year</td> <td data-bbox="882 1357 1145 1451">10% to 100%</td> <td data-bbox="1153 1357 1398 1451">Low to Medium</td> </tr> </tbody> </table> <p>*Debt instruments are deemed to include securitised debt and investment in securitised debts shall not exceed 50% of the net assets of the Scheme.</p> <p>Note: The asset allocation shown above is indicative and may vary according to circumstances at the sole discretion of the Fund Manager, on defensive consideration or according to the interest rate view of the Fund Manager. Also, the composition may change due to purchases and redemption of Units or during adjustment of the average maturity of investments. Should the proportion of investments with maturity more than 1 year fall below 25%, the portfolio will be reviewed and rebalancing will be conducted within 10 working days.</p>	Investments	Indicative Allocation	Risk Profile	* Debt Instruments with maturity more than one year	25% to 100%	Medium	* Debt and Money Market instruments with maturity less than one year	10% to 100%	Low to Medium
Investments	Indicative Allocation	Risk Profile								
* Debt Instruments with maturity more than one year	25% to 100%	Medium								
* Debt and Money Market instruments with maturity less than one year	10% to 100%	Low to Medium								
Investment Strategy and Risk Control Measures	<p>The Scheme may invest in listed/unlisted and/or rated/unrated debt or money market instruments/securities, Gilts/Government Securities, securities issued/guaranteed by the Central/State Governments, securities issued by public/private sector companies/corporations, financial institutions and/or</p>									

	<p>money market instruments such as commercial paper, certificates of deposit, permitted securities under a repo agreement etc., provided the investments are within the limits indicated in the asset allocation pattern. The instruments may carry fixed rate of return or floating rate of return or may be issued on discount basis. Investments are made in such instruments, which, in the opinion of the Fund Manager, are an acceptable credit risk where chances of default are at a minimum. The Fund Manager is generally guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio. The maturity profile of debt instruments is selected in accordance with the Fund Manager's view regarding market conditions, interest rate outlook and stability of rating. The Scheme may invest in call money/term money market in terms of RBI guidelines in this respect. Investment in unrated debt securities is made with the prior approval of the Board of the AMC, provided the investment is in terms of the parameters approved by the Board of the Trustee. Where the proposed investment is not within the parameters as mentioned above, approval of the Boards of both the AMC and the Trustee is taken before making the investment.</p> <p>To avoid duplication of portfolios and to reduce expenses, the Scheme may invest in any other scheme of the Fund to the extent permitted by the Regulations. In such an event, as per the Regulations, the AMC cannot charge management fees on the amounts of the Schemes so invested.</p> <p>The Fund may underwrite primary issuances of securities subject to the Regulations.</p> <p>To reduce the risk of the portfolio, the Scheme may also use various derivative and hedging products from time to time, in the manner permitted by SEBI.</p> <p>Subject to the maximum amount permitted from time to time, the Scheme may invest in offshore debt securities, in the manner allowed by SEBI/RBI, provided such investments are in conformity with the investment objective of the Scheme and the prevailing guidelines and Regulations.</p>
Portfolio Turnover	<p>The Scheme has no specific target relating to turnover of securities, given the low liquidity in the debt market. However, the turnover is guided by sale and purchase of securities arising out of the purchase and redemption of Units and adjustments relating to the average maturity of securities in the portfolio, depending on the interest rate view of the Fund Manager. Turnover may also arise due to change or anticipation of change in the credit worthiness or credit rating of securities.</p>
Benchmark	<p>The performance of the Scheme is measured against Crisil Composite Bond Fund Index.</p> <p>The composition of the aforesaid benchmark is such that, it is most suited for comparing the performance of the scheme.</p> <p>The Trustees reserves right to change benchmark in future for measuring performance of the scheme.</p>
Risk Mitigation	<p>Risk control measures for investment strategy</p> <p>The fund will comply with the prescribed SEBI limits on exposure. Risk is monitored at periodic intervals and the portfolio is rebalanced within the specified time period in case of any deviations.</p> <p>Risk mitigation measures for portfolio volatility</p> <p>The portfolio volatility is managed in line with the objective of scheme.</p>

Duration is managed actively after considering various factors affecting interest rates. The scheme also invests a significant portion in high credit quality papers to mitigate credit risk and the resultant volatility. Portfolio volatility is monitored on a periodic basis relative to the benchmark and the peer set.

Risk mitigation measures for managing liquidity

Reasonable investments are made at the shorter end of the yield curve which is the most actively traded segment in the secondary market. This would help to manage daily liquidity. The internal investment parameters also take into cognizance liquidity of the portfolio.

Overview of Debt Market

The Indian Debt Market has grown in size substantially over the years. The Reserve Bank of India has been taking steps to make the Indian Debt Market efficient and vibrant. The interest rates were regulated till a few years back, there has been rapid deregulation and currently both the lending and deposit rates are market determined. The Central banker has in its recent credit policy meetings suggested the importance of a fully developed corporate bond market and efforts are being made to have an online trading platform for corporate bonds.

Broadly, the debt market is divided in two parts viz. the Money Market and the Debt market. Money market instruments have a tenor of less than one year while debt market instruments have a tenor of more than one year. Money market instruments are typically commercial paper, certificates of deposit, treasury bills, trade bills, repos, interbank call deposit receipts etc. Debt market comprises typically of securities issued by Governments (Central and State), Banks, Financial Institutions, and Companies in the private and public sector, Corporations, Statutory Bodies etc.

The debt securities are mainly traded over the telephone directly or through brokers. The National Stock Exchange of India has a separate trading platform called the Wholesale Debt Market segment where trades put through member brokers are reported. The daily volumes in the debt market are in the region of Rs.2500-5000 crores. –

RBI has introduced the Negotiated Dealing System (NDS) platform for screen-based trading in Government Securities and Money Market instruments. Most of the market participants are now operating through NDS. Promoted by major banks and financial institutions, The Clearing Corporation of India Ltd. (CCIL), was incorporated on April 30, 2001. The CCIL guarantees the settlement of all trades executed through NDS. The clearing and settlement risks viz., Counter party Credit Risk and Operational Risk are mitigated by CCIL thereby facilitating a smooth settlement process.

The following table gives approximate yields prevailing as on June 20, 2017 on some of the money and debt market instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing.

Instrument	Yield Range (% per annum)
Inter bank Call Money	6.20 - 6.25
91 Day Treasury Bill	6.25 – 6.30
364 Day Treasury Bill	6.35 – 6.40
P1+ Commercial Paper 90 Days	6.35 – 6.40
3-Year Government of India Security	6.45 – 6.49
5-Year Government of India Security	6.54 – 6.60
10-Year Government of India Security	6.40 – 6.45

Generally, for instruments issued by a non-Government entity, the yield is higher than the yield on a Government Security with corresponding maturity. The difference, known as credit spread, depends on the credit rating of the entity. Investors must note that the yields shown above are the yields prevailing on June 20, 2017, and they are likely to change consequent to changes in economic conditions and RBI policy.

C. Where will the scheme invest?

Subject to the Regulations, the amount collected under the scheme can be invested in any (but not exclusively) of the following securities/ instruments, as per the indicative asset allocation given under the heading “How will the Scheme allocate its assets”:

1. Securities created and issued/ guaranteed by the Central and State Governments and/or repos/ reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
2. Debt obligations of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee (including but not limited to Indian Government Bond, State Development Loans issued and serviced at the Public Debt Office, Bonds issued by Central & State Government PSU's which are guaranteed by Central or State Governments)
3. Corporate debt (of both public and private sector undertakings) including Non convertible debentures (including bonds) and non-convertible part of convertible securities.
4. Obligations/ Term Deposits of banks (both public and private sector) and development financial institutions to the extent permissible under SEBI Regulations
5. Money market instruments permitted by SEBI/RBI, having maturities of up to one year or in alternative investment for the call money market as may be provided by the RBI to meet the liquidity requirements.
6. Certificate of Deposits (CDs).
7. Commercial Paper (CPs).
8. Repo of corporate debt securities
9. Securitised Debt, not including foreign securitised debt.
10. Offshore securities / offshore debt securities, in the manner allowed by SEBI/RBI, provided such investments are in conformity with the investment objective of the Scheme and the prevailing guidelines and Regulations.
11. The non-convertible part of convertible securities.
12. Any other domestic fixed income securities as permitted by SEBI / RBI from time to time.
13. Derivative instruments like Interest Rate Swaps, Forward Rate Agreements and such other derivative instruments permitted by SEBI/RBI.
14. Collateralised Borrowing and Lending Obligation (CBLO) or repo or any alternative investment as may be provided by RBI.
15. Any other instruments / securities, which in the opinion of the fund manger would suit the investment objective of the scheme subject to compliance with extant Regulations.

Note:

The securities/debt instruments mentioned above could be listed or unlisted, secured or unsecured, rated or unrated and of varying maturities and other terms of issue. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offer or negotiated deals. The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by it as per guidelines/regulations applicable to such transactions.

Interest Rate Swap (IRS)

IRS is a widely used derivative product in the financial markets to manage interest rate risk. A typical transaction is a contract to exchange streams of interest rate obligation/income on a notional principle amount with a counter party, usually a bank. The two interest streams are, fixed rate on one side and floating rate on the other.

Example: Suppose the Fund holds a fixed rate bond of maturity 5 years carrying a fixed interest rate (coupon) of 6% p.a. payable half yearly. Such an investment runs the risk of depreciation if interest rates rise. To manage this risk, the Fund can enter into an IRS with another market participant, here the Fund contracts to pay fixed rate, say 5.25% p.a., and receive a floating rate (say overnight MIBOR). This transaction is done for a notional principal amount equal to the value of the investment. By such a contract a fixed rate income is offset by a fixed rate payment obligation leaving only a floating rate income stream. Thus, without actually investing in a floating rate asset, the Fund starts earning a floating rate income, reducing the risk of depreciation associated with the fixed rate investment. Following table summarises the cash flow streams:

Original investment	6% p.a.
Pay (Fixed rate)	5.25% p.a. (IRS)
Receive (Floating rate)	MIBOR
Net Flow	MIBOR + 0.75% p.a. (*)

* (6% p.a. – 5.25 % p.a.)

The floating rate reference is defined in the swap agreement.

The above example illustrates a case of fixed to floating rate swap. A swap could be done to move from floating rate to fixed rate in a similar fashion.

Please note that the above example is hypothetical in nature and the interest rates are assumed. The actual return may vary based on actual and depends on the interest rate prevailing at the time the swap agreement is entered into.

The Scheme will be allowed to take exposure in Interest Rate Swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio.

The Scheme may use other derivatives such as interest rate futures, etc, to meet the investment objective of the Scheme, whenever such instruments are available in the market.

Interest Rate Futures (IRFs)

Interest Rate Futures (IRF) contract is an agreement to buy or to sell a debt instrument at a specified future date at a price that is fixed today. Exchange traded IRFs are standardised contracts based on a notional coupon bearing Government of India (GOI) security. National Securities Clearing Corporation Limited (NSCCL) is the clearing and settlement agency for all deals executed in Interest Rate Futures. NSCCL acts as legal counter-party to all deals on Interest Rate Futures contract and guarantees settlement.

Using IRFs

- **Directional trading**

As there is an inverse relationship between interest rate movement and underlying bond prices, the futures price also moves in tandem with the underlying bond prices. If one has a strong view that interest rates will rise in the near future and wants to benefit from rise in interest rates; one can do so by taking short position in IRF contracts.

Example:

A trader expects long-term interest rate to rise. He decides to sell Interest Rate Futures contracts as he shall benefit from falling future prices.

Expectation	Position
Interest Rates going up	Short Futures
Interest Rates going down	Long Futures

- Trade Date- 1st April 2017
 - Futures Delivery date – 1st May 2017
 - Current Futures Price- Rs. 97.50
 - Futures Bond Yield- 8.21%
 - Trader sell 250 contracts of the May 2017 - 10 Year futures contract on NSE on 1st April 2017 at Rs. 97.50
- Assuming the price moves to Rs. 97.15 on April 9, 2017, net MTM gain would be Rs. 1,75,000 (250*2000*97.50-97.15) (I)
- Closing out the Position
- 10th April 2017 - Futures market Price – Rs. 96.70
 - Trader buys 250 contracts of May 2017 at Rs. 96.70 and squares off his position
 - Therefore total profit for trader 250*2000*(97.15-96.70) is Rs.2,25,000 (II)
 - Total Profit on the trade = INR 4,00,000 (I & II)

Hedging

Holders of the GOI securities are exposed to the risk of rising interest rates, which in turn results in the reduction in the value of their portfolio. So in order to protect against a fall in the value of their portfolio due to falling bond prices, they can take short position in IRF contracts.

Example:

Date: 01-April-2017

Spot price of GOI Security: Rs 105.05

Futures price of IRF Contract: Rs 105.12

On 01-April-2017 XYZ bought 2000 GOI securities from spot market at Rs 105.07. He anticipates that the interest rate will rise in near future. Therefore to hedge the exposure in underlying market he may sell May 2017 Interest Rate Futures contracts at Rs 105.12

On 16-May-2017 due to increase in interest rate:

Spot price of GOI Security: Rs 104.24

Futures Price of IRF Contract: Rs 104.28

Loss in underlying market will be $(104.24 - 105.05) * 2000 = \text{Rs } 1620$

Profit in the Futures market will be $(104.28 - 105.12) * 2000 = \text{Rs } 1680$

Arbitrage

Arbitrage is the price difference between the bonds prices in underlying bond market and IRF contract without any view about the interest rate movement. One can earn the risk-less profit from realizing arbitrage opportunity and entering into the IRF contract.

Example:

On 18th April, 2017 buy 6.35% GOI '20 at the current market price of Rs. 97.2485

Step 1 - Short the futures at the current futures price of Rs. 97.80

Step 2 - Fund the bond by borrowing up to the delivery period (assuming borrowing rate is 8.00%)

Step 3 - On 10th May 2017, give a notice of delivery to the exchange

Under the strategy, the trader has earned a return of

$$= (97.800 - 97.2485) / 97.2485 * 365 / 23$$

$$= 9.00 \% \text{ (implied repo rate)}$$

(Note: For simplicity accrued interest is not considered for calculation)

Against its funding cost of 8.00% (borrowing rate), thereby earning risk free arbitrage.

Stated below are the key features of other open ended debt schemes of Kotak Mahindra Mutual Fund.

Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Trustees

For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 (Regulations) and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

The AMC may alter these above stated restrictions from time to time to the extent the SEBI (MF) Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its investment objective. The Trustee may from time to time alter these restrictions in conformity with the SEBI (MF) Regulations.

All investment restrictions shall be applicable at the time of making investment.

Apart from the above investment restrictions, the Fund follows certain internal norms within the above mentioned restrictions, and these are subject to review from time to time.

Modifications, if any, in the Investment Restrictions on account of amendments to the Regulations shall supercede/override the provisions of the Trust Deed.

Limits for investment in derivatives instruments

As per SEBI circular no. Cir / IMD / DF / 11 / 2010 dated August 18, 2010 on “Review of norms for investment and disclosure by Mutual Funds in derivatives”, the limits for exposure towards derivatives are as under:

1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following :-
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.

Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts

Participation of scheme of Kotak Mahindra Mutual Fund in repo of corporate debt securities:

In accordance with SEBI circular no. CIR / IMD / DF / 19 / 2011 dated November 11, 2011 and CIR/IMD/DF/23/2012 dated November 15, 2012; schemes of Kotak Mahindra Mutual Fund (KMMF) shall

participate in the corporate bond repo transactions w.e.f. June 21, 2013 as per the guidelines issued by Reserve Bank of India (RBI) from time to time. Currently the applicable guidelines are as under:

- The gross exposure of the scheme to repo transactions in corporate debt securities shall not be more than 10 % of the net assets of the concerned scheme.
- The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt and derivatives shall not exceed 100% of the net assets of the concerned scheme.
- Mutual Funds shall participate in repo transactions only in AA and above rated corporate debt securities.
- In terms of Regulation 44 (2) mutual funds shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months

The investment restrictions applicable to the Scheme's participation in the corporate bond repos will also be as prescribed or varied by SEBI or by the Board of Kotak Mahindra Trustee Company Limited (subject to SEBI requirements) from time to time.

The following guidelines shall be followed by Kotak Mahindra Mutual Fund for participating in repo in corporate debt securities, which have been approved by the Board of AMC and Trustee Company.

(i) Category of counterparty to be considered for making investment:

All entities eligible for transacting in corporate bond repos as defined by SEBI and RBI shall be considered for repo transactions.

(ii) Credit rating of counterparty to be considered for making investment

The schemes shall participate in corporate bond repo transactions with counterparties having a minimum investment grade rating and is approved by the Investment Committee on a case-to-case basis. In case there is no rating available, the Investment Committee will decide the rating of the counterparty, and report the same to the Board from time to time.

(iii) Tenor of Repo and collateral

As a repo seller, the schemes will borrow cash for a period not exceeding 6 months or as per extant regulations.

As a repo buyer, the Schemes are allowed to undertake the transactions for maximum maturity upto one year or such other terms as may be approved by the Investment Committee.

There shall be no restriction / limitation on the tenor of collateral.

(iv) Applicable haircuts

As per RBI circular RBI/2012-13/365 IDMD.PCD. 09 /14.03.02/2012-13 dated 07/01/2013, all corporate bond repo transaction will be subject to a minimum haircut given as given below:

(1) AAA	: 07.50%
(2) AA+	: 08.50%
(3) AA	: 10.00%

The haircut will be applicable on the prevailing market value of the said security on the prevailing on the date of trade. However, the fund manager may ask for a higher haircut (while lending) or give a higher haircut (while borrowing) depending on the market prevailing liquidity situation.

Risk envisaged and mitigation measures for repo transactions:

Credit risks could arise if the counterparty does not return the security as contracted or interest received by the counter party on due date. This risk is largely mitigated, as the choice of counterparties is largely restricted and their credit rating is taken into account before entering into such transactions. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counterparty may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to us. Thus the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

Investments in securitized debt instruments

How the risk profile of securitized debt fits into the risk appetite of the scheme:

The scheme investment pattern permits investments in debt and money market instruments with extended maturities. Under this the investments could be in the following form of issuances, viz. CPs, CDs, Securitised debt, etc. i.e for the same acceptable levels of risks there could be multiple instruments available to a Fund Manager. Based on the credit assessment of the issuers the Fund Manager may chose to invest in securitized debt.

Our evaluation process for investment in securitized debt is similar to the approach followed for other types of instruments including money market and bonds. We lay emphasis on credit, liquidity and duration risk while evaluating every prospective investment, keeping in mind the investment objectives of the particular scheme.

Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt etc:

The Fund Manager shall do a comprehensive credit assessment of the structure before investment. This includes originator's credit origination standards, track record on asset quality, more specifically its track record in respect the asset class that is being securitized and also the performance of the pools securitised by the originator in the past. No investments will be made in instruments rated below certain grades as prescribed by the investment committee or in unrated instruments. Prior approval of Trustee will be taken, in case of any investments in unrated instruments.

The securitised paper may pertain to a single asset class e.g., car loans or commercial vehicle loans or a combination of different asset classes i.e. car loans, two wheeler loans and commercial vehicle loans. Investment focus is towards diversification in the asset pool in terms of geography, underlying collateral. Although there is no specific guidelines with respect minimum period for which the originator had held the loans in its books), appropriateness of the seasoning (the period for which the originator has held loans on its books) and also the loan to value and instilment to income profile of the pool are important parameters for making investment decision.

In case of single loan securitization, the originator merely transfers the loan existing in his book by way of a single loan selldown. The obligation to repay and service the debt remains with the underlying obligor and hence, it is the obligor whose standalone business and financial risk profile is evaluated. Therefore, the credit rating of a single loan structure mirrors the credit rating of the obligor.

For pool securitization, where the debt repayment is dependent on the underlying pool of borrowers, it is important to evaluate the characteristics of the pool including the type of loan, loan to value ratio, ticket size of loan, geographic distribution etc. and the track record of the originator in terms of volume of securitization activity, historical losses seen in similar pools, stability in cash flow servicing and utilization level of credit enhancement.

Risk Mitigation strategies for investments with each kind of originator:

Apart from the above, risk assessment process includes examination of the credit enhancements offered under the present PTC structure, utilization of credit enhancement in the previous securitization structures of the originator and the trends in credit enhancement utilization of securitization transactions of similar asset classes

of other originators. The size & reach of originators, its infrastructure & follow-up mechanism, quality of MIS & the collection process are also considered for each originator.

The nature of the instrument, underlying risks, underlying risk migration perceptions would decide the tenure of the said investments.

There is clear cut segregation of duties and responsibilities with respect to Investment Function and Sales function. Risk assessment and monitoring of investment in Securities Debt is done by a team comprising of credit analyst, fund manager and Head of Fixed Income. The Investment committee also looks into a first time investment in credit, apart from sanctioning overall limits for the same. Investment Decisions are being taken independently based on the above mentioned parameters and investment by the originator in the scheme is based on their own evaluation of the scheme vis a vis their investment objective.

Originator risk can be evaluated and mitigated on the basis of –

- (a) Market position and size of the originator and expertise/niche in financing a particular type of asset.
- (b) Systems and processes established by the originator to address operational risk relating to disbursement, collection and recovery of loans.
- (c) Extent of data disclosed by the originator for the current pool as well as past pools which showcases the data mining capability of the originator.
- (d) Credit enhancement provided based on the pool characteristics, historical performance of past pools and the base case losses assumed by the credit agency.

The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments:

Framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

Characteristics/ Type of Pool	Mortgage Loan	CV & CE	Cars	Two Wheelers	Micro Finance	Personal Loans	Single loan sell down
Average maturity (in months)	36m-72m	12m-36m	12m-36m	12m-24m	3m-18m	12m-24m	12m-36m
Collateral margin (including cash, guarantees, excess interest spread, subordination)	5%-25%	10%-25%	10%-25%	Min 15%	Min 20%	Min 20%	NA
Average Loan-to-value	70%-90%	65%-90%	65%-90%	50%-75%	NA	NA	NA
Average Pool Seasoning (in months)	6m-12m	3m-6m	3m-6m	3m-6m	1m-3m	3m-6m	NA
Maximum exposure per ABS transaction	5%-15%	5%-15%	5%-15%	5%-10%	5%-15%	5%-10%	5%-15%

Note - Kindly note that these are indicative ranges and final figures could vary depending upon the overall characteristics of the transaction and market conditions

In respect of single sell down loans the process would be similar to the one adopted for investing in the issuer directly. Similarly the fund in the normal course of business would not be investing in personal / micro finance pools, unless the levels of comfort arising of the transaction structures , satisfy the investment committee.

The above table is prepared after considering the risk mitigating measures such as Size of the loan, Average original maturity of the pool, Average seasoning of the pool, Loan to Value Ratio, Geographical Distribution and Structure of the pool, default rate distribution & credit enhancement facility. The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same. This framework would be used as a reference for evaluation of investment into any securitized debt. However, each investment would also be evaluated on a case to case basis on its own merits apart from these limits.

Other risk mitigation measures

(a) Loan to Value Ratio – is an important parameter which highlights the underwriting standards of the issuer. Also, lower LTV ratios generally result in higher recoveries in case of default.

(b) Average seasoning of the pool - may vary depending on the asset type. Higher seasoning is preferred as it gives better visibility on delinquency levels in the pool.

(c) Default rate distribution – this is studied using empirical data for the originator. This is also a critical data used by the rating agency in determining the credit enhancement levels to be stipulated.

(d) Geographical Distribution – helps in identifying concentration risk in a particular geography and therefore reduces the default risk.

(e) Credit enhancement facility – is provided in pool securitization transactions and is very important as it is used to absorb credit losses stemming from default in the pool assets. The size of credit enhancement is determined on the basis of the issuer's credit risk profile, the type of asset being securitized and past pool performances.

(f) Liquidity facility – in some cases, in addition to the credit enhancement facility there is also a liquidity facility provided which is used to meet any shortfalls arising from delayed collections or delinquencies in the pool.

Minimum retention percentage by originator of debts to be securitized:

Although there is no specific guidelines with respect minimum retention percentage for which the originator had held the loans in its books), appropriateness of the seasoning (the period for which the originator has held loans on its books) and also the loan to value and installment to income profile of the pool are important parameters for making investment decision.

Minimum retention period of the debt by originator prior to securitization

For single loan securitization, there is currently no regulation for minimum retention period of debt by the originator. Our investment decision is driven by the credit quality of the underlying obligor.

For pool securitization, there is currently no regulation for minimum retention period of debt by the originator. Generally the pool assets we acquire in the form of PTCs have a retention period of 3-6 months by the originator. We follow the extant guidelines pertaining to securitization as set out by the regulator.

The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund:

An investment by the scheme in any security is done after detailed analysis by the Fixed Income team and in accordance with the investment objectives and the asset allocation pattern of a scheme. The robust credit process ensures that there is no conflict of interests when a scheme invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme. Normally the issuer who is securitizing instrument is in need of money and is unlikely to have long term surplus to invest in mutual fund scheme. Furthermore, there is clear cut segregation of duties and responsibilities with respect to Investment function and Sales function. Investment decisions are being taken independently based on the above mentioned

parameters and investment by the originator in the scheme is based on their own evaluation of the scheme vis a vis their investment objectives

Our investment decisions are independent of other business functions and are solely based on the assessment of credit risk, liquidity risk and duration risk pertaining to a particular security.

The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

Risk assessment and monitoring of investment in Securities Debt is done by a team comprising of credit analyst, fund manager and Head of Fixed Income. The Investment committee also looks into a first time investment in credit, apart from sanctioning overall limits for the same. Investment Decisions are being taken independently based on the above mentioned parameters and investment by the originator in the scheme is based on their own evaluation of the scheme vis a vis their investment objective.

Apart from monitoring the credit quality of the underlying obligator / originator, for pool securitization transactions we closely monitor the monthly pool performance report which is sent out by the trustee. The reports are tracked for changes in specific pool characteristics which can impact the collection performance and loss levels in the pool.

Note: In the above table, Monthly SIP Installment Amount increases by SIP Booster amount of Rs 1,000 at halfyearly intervals.

The Trustee/AMC reserves the right to change/modify the provisions mentioned facility at a later date.

Systematic Withdrawal Plan:

This facility enables the Unitholders to withdraw (subject to deduction of tax at source, if any) sums from their investments in the Scheme at periodic intervals through a one-time request. The withdrawals can be made either Monthly (on 1st, 7th, 14th, 21st or 25th of every month) or Quarterly (on 1st, 7th, 14th, 21st or 25th, as the case may be. In case any of these days fall on non-business day the transaction will be effected on the next business day of the scheme. SWP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of SWP. In case the SWP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the SWP registration request received for a period lesser than 7 days in the interest of unit holders.

Example: for Monthly SWP if the SWP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this SWP will be from 7th February onwards.

This facility is available in two options to the Unitholders:

Fixed Option: Under this option, the Unitholder can seek redemption of a fixed amount of not less than Rs. 1000 from his Unit account. In this option the withdrawals will commence from the Start Date (being one of the dates indicated above) mentioned by the Unitholder in the Application Form for the facility. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. If the net asset value of the units outstanding on the withdrawal date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs 1000 after processing of the last SWP installment then the entire amount will be processed along the last SWP installment.

Appreciation Option: Under this option, the Unitholder can seek redemption of an amount equal to a periodic appreciation on the investment.

The Unitholder redeems only such number of Units, which when multiplied by the Applicable NAV is, in amount terms equal to the appreciation in his investment over the last month / quarter.

The investor would need to indicate in his systematic withdrawal request, the commencement / start date from which the appreciation in investment value should be computed. The withdrawal will commence after one month/quarter (as requested by the investor) from the commencement / start date mentioned by the Unitholder in the Application Form and can, at the investor's discretion be on 1st, 7th, 14th, 21st or 25th of the month / quarter.

The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. In case the investor purchases additional Units, the withdrawal amount would include the appreciation generated on such Units as well. In the absence of any appreciation, the redemption under this option will not be made.

For both fixed and appreciation option the provision of minimum redemption amount / units will not be applicable for redemption made under this facility.

Systematic Transfer Plan (STP)

This facility enables the Unitholders to switch an amount from their existing investments in a Scheme/Plan/Option to another Scheme/Plan/Option of the Fund, which is available for investment at that time, at periodic intervals through a one-time request. The switch can be made weekly, monthly or quarterly. Under this facility the switch by the Unitholders should be within the same account/ folio number. The withdrawals can be made either Weekly or Monthly (on any business day) or Quarterly (on any business day). The amount so switched shall be reinvested in the other scheme / plan and accordingly, to be effective, the systematic transfer must comply with the redemption rules of transferor scheme and the issue rules of transferee scheme (e.g. exit / entry load etc)

STP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of STP. In case the STP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the STP registration request received for a period lesser than 7 days in the interest of unit holders.

Example: for Monthly STP if the STP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this STP will be from 7th February onwards.

This facility offers two options to the Unitholders:

Fixed Option: Under this option, the Unitholder can switch fixed amount of not less than Rs. 1000/- from his Unit account. In this option the switch will commence from the Start Date mentioned by the Unitholder in the application form for the facility. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought will be created at the Applicable NAV of such Scheme/Plan/Option on the respective dates. If the net asset value of the units outstanding on the transfer date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs 1000 after processing of the last STP installment, then the entire amount will be processed along the last STP installment.

Appreciation Option: Under this option, the Unitholder can seek switch of an amount equal to the periodic appreciation on the investment. Under this option the Unit holder switches only proportionate number of Units, which when multiplied by the applicable NAV is, in amount terms equal to the appreciation in the investment over the last month/quarter.

For both Fixed and appreciation option the provision of minimum redemption and minimum investment amount / units will not be applicable for transfer / switch transactions made under this facility for both switch out and switch in schemes.

The investor has to mention a "Start Date". The first switch will happen after one month/quarter from the start date. In case the investor purchases additional Units, the amount to be switched would be equal to the appreciation generated on such Units. In the absence of any appreciation as mentioned above, the switch under this option will not be made. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought will be allotted at the Applicable NAV of such Scheme/Plan/Option on the respective dates.

Dividend Transfer Plan (DTP):

Dividend Transfer Plan (DTP) is a facility whereby the unit holders under the Dividend Options (other than Daily Reinvestment Sub-option) of the open ended Schemes of KMMF can opt to transfer their dividends to any other Investment option (other than Daily Reinvestment Sub-option) under any other open ended schemes of KMMF. DTP facility will be available to unit holder(s) holding units in non-demat form under the Dividend Option of the Transferor Schemes.

Under the DTP facility investors cannot transfer their dividends into certain category of transferee schemes viz, close ended Schemes, Exchange Traded Funds (ETFs), and Kotak Tax Saver Scheme.

Under DTP, dividend as & when declared (as reduced by the amount of applicable statutory levy) in the transferor scheme (subject to minimum of Rs.500/-) will be automatically invested without any exit load into the transferee scheme, as opted by the Unit holder. Such transfer will be treated as fresh subscription in the transferee scheme and invested at the Applicable NAV of the Transferee Scheme. If the dividend amount in the Transferor Scheme is less than Rs.500/- the dividend will be automatically reinvested in the Transferor Scheme itself and hence will not be transferred. The provision for 'Minimum Application Amount' specified in the respective transferee scheme's SID will not be applicable under DTP.

Enrolment under the DTP facility will automatically override any previous instructions for 'Dividend Payout' or 'Dividend Reinvestment' option in the transferor scheme. No Exit Load will be levied on units allotted in the Transferee Scheme under the Dividend Transfer Plan.

Unit holders who wish to enroll for the DTP facility are required to fill DTP Enrollment Form available with the ISC's, distributors/ agents and also available on the website www.assetmanagement.kotak.com

The request for enrolment or cancellation for DTP must be submitted at least 7 days prior to the Record Date for the dividend. In case of the condition not being met, the enrolment would be considered valid from the immediately succeeding Record Date of the dividend, provided the difference between the date of receipt of a valid application for enrolment under DTP and the next Record Date for the dividend is not less than 7 days.

The AMC / Trustee reserve the right to change/ modify the terms and conditions of the DTP on a prospective basis.

Switching

Unitholders of the Scheme have the option of switching in or out all or part of their investment in the Scheme/ Plan/ Option to any other Option of the Scheme or to any other Scheme / Plan/ Option of the Fund.

A switch has the effect of redemption from a Scheme/Plan/ Option and a purchase in the other Scheme/Plan/Option to which the switching has been done and all the terms and conditions pertaining to redemption and purchase of the Units of the respective Scheme shall apply to a switch, unless otherwise specified.

Switch is affected by redeeming Units from the Scheme/ Plan/Option and investing the net proceeds in the other Scheme/Plan/Option.

Trigger Facility

Unitholders of the Scheme have the option under this facility to automatically redeem/ switch the units to any other scheme on the occurrence of any one of the trigger option as specified by Unit holder

➤ **Trigger Options:**

- **Value Trigger (Amount based)**
- **Appreciation/Depreciation Trigger (% based)**

Value Trigger: Under this option the investors will be given a choice to indicate the exit trigger as and when investment value increases/decreases by a particular sum.

Appreciation/Depreciation Trigger: Under this option the investors will be given a choice to indicate the exit trigger as and when investment value appreciates/depreciates by a particular percentage (%) (Whole Numbers only e.g. 10%, 11%) of investment value.

➤ **Actions on occurrence of Trigger:**

Additionally the investor can choose any of the applicable actions on occurrence of trigger:

1. Redemption/Switch to the extent of capital appreciation or
2. Redemption/Switch of Full amount or
3. Redemption/Switch of Partial amount (%)

➤ **Trigger Facility will be available in:**

The investors of the scheme, on occurrence of trigger can opt for switch in their investments in any of below mentioned transferee schemes:

- Kotak Liquid
- Kotak Floater Short Term
- Kotak Treasury Advantage
- Kotak Low Duration Fund
- Kotak Banking & PSU Debt Fund

Notes:

1. Trigger Facility will be a one time facility which can be selected by the investors. On occurrence of trigger and post completion of corresponding action, the trigger facility will be automatically deactivated.
2. Trigger Facility will be available only for growth option. In case investor has opted for trigger facility and subsequently switches from growth option to dividend option, the trigger facility will be automatically deactivated
3. Minimum Investment in the facility – Rs. 20,000, and in multiples of Rs 0.01 thereof.
4. The minimum application amount criteria for switch into transferee schemes will not be applicable.
5. NAVs of the schemes are declared at the close of the business day and hence value of the unit holder's unit holdings based on the end of day NAV will be considered as a base for activating the triggers. Accordingly, all the redemptions/switches etc. will be done on the day on which the trigger occurs. Applicable NAV of switch in schemes will be applied.
6. All requests for registering or deactivating the trigger facility shall be subject to an advance notice of 10 (Ten) business days. Investors can deactivate the trigger facility by sending a written request to the Investor Service Centres. Trigger facility shall be applicable subject to exit load, if any, in the scheme.
7. Investor cannot modify a Trigger registration once submitted. Investor must cancel the existing Trigger option and enroll for a fresh Trigger option.
8. Trigger Facility is not available if the Folio / Certificate is under Lien or marked "FROZEN" on the advice of I.T Authorities /regulatory authorities/ Court or any other reason.

	<p>9. All trigger option will be processed at transaction level. Since, redemption is processed on First-in-First-out basis, investors having multiple transactions in single folio and opting for trigger facility will have to select the redemption action at transaction level.</p> <p>10. Existing investors of the scheme can opt for trigger facility by completing the necessary formalities.</p> <p>11. Systematic Withdrawal Plan (SWP)/Systematic Transfer Plan (STP) facilities will not be available for the investors, if they opt for trigger facility.</p> <p><u>Long Term Income Facility (LTI):</u></p> <p>Long Term Income (LTI) is only a facility for regular withdrawal from the Scheme. This facility will allow investors to redeem a fixed sum of money on monthly/ quarterly basis at the prevailing Net Asset Value (NAV) within the range of 6% p.a. to 10% p.a. (in multiples of 0.5%) of the investment amount. The percentage of withdrawal will be selected by investor.</p> <p>LTI facility is only available under the growth option only. Investors shall be required to submit LTI registration request at least 15 days prior to the date of 1st instalment. Minimum amount of investment required for availing the LTI facility is Rs.1 lakh.</p> <p>Investors can opt for this facility and withdraw their investments systematically on a Monthly/ Quarterly basis. Withdrawals will be made/ effected on the 1st/7th /14th /21st / 25th of every month/ every quarter and would be treated as redemptions. In case the aforesaid date is a holiday, then it would be effected on next business day.</p> <p>The applicant has the right to discontinue the LTI at any time, if he / she so desires, by providing a written request at any of the Kotak Mahindra Mutual Fund branches or Registrar's branches. Request for discontinuing LTI shall be subject to an advance notice of 7 (seven) working days.</p>

Note (2); The expression ‘Infrastructure debt fund’ has been defined in clause 1 of regulation 49 L of the Securities and Exchange Board of India (Mutual Fund) regulations 1996. As per clause 1 of Regulation 49 L, an infrastructure debt fund scheme means a mutual fund scheme, that invests primarily (minimum 90% of scheme assets) in debt securities or securitized debt instrument of infrastructure companies or infrastructure capital companies or infrastructure projects or special purpose vehicles which are created for the purpose of facilitating or promoting investment in infrastructure, and other permissible assets in accordance with these regulations or bank loans in respect of completed and revenue generating projects of infrastructure companies or projects or special purpose vehicles.

Note 3) : Long-term capital gains in case of non-residents (other than FII) would be taxable @ 10% on transfer of capital assets, being unlisted securities, computed without giving effect to first and second proviso to section 48 i.e. without taking benefit of foreign currency fluctuation and indexation benefit. In case of listed securities being units of Mutual Fund, the tax payable would be @ 20% after indexation benefit.

Long term capital gains in the case of FIIs would be taxable @10% on transfer of capital assets being securities (listed or unlisted) without giving effect to the first and second proviso to section 48 i.e. without taking the benefit of foreign currency fluctuation and without indexation.

Under section 10(23D) of the Income tax Act, 1961, income earned by a Mutual Fund registered with SEBI is exempt from income tax.

Since the aforesaid scheme do not qualify as an equity oriented fund, no Securities Transaction tax is payable by the unit holders on redemption / repurchase of units by the Fund.

For further details on taxation please refer to the clause on taxation in the SAI.

C. Computation of NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

The Fund shall value its investments according to the valuation norms, as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

NAV of Units under the Scheme will be calculated as shown below:

NAV=	Market or Fair Value of Scheme's investments	+	Current assets including Income	-	Current Liabilities and provisions including accrued expenses
	No. of Units outstanding under the Scheme/Option.				

NAV for the Scheme and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto four decimals for each scheme

Computation of NAV will be done after taking into account dividends paid, if any, and the distribution tax thereon, if applicable. Therefore, once dividends are distributed under the Dividend Option, the NAV of the Units under the Dividend Option would always remain lower than the NAV of the Units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

V. FEES AND EXPENSES

A. New Fund Offer (NFO) Expenses

This is an ongoing scheme on the date of updating this document.

B. Total Expense Ratio (TER)

Total Expense Ratio is the total of ongoing fees and operating expenses charged to the scheme, expressed as a percentage of the scheme's daily net assets.

These fees and expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, brokerage/commission, marketing and selling costs etc.

The maximum total expenses of the scheme under Regulation 52(6)(c) shall be subject to the following limits:

Additional expenses under regulation 52 (6A) (c)	Upto 0.20%
Additional expenses for gross new inflows from specified cities	Upto 0.30%

Expense Structure for Direct Plan – The annual recurring expenses will be within the limits specified under the SEBI (Mutual Funds) Regulations, 1996.

However, Direct Plan shall have a lower expense ratio than the Regular Plan. The expenses would exclude distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Plan.

Additional expenses which may be charged to the Scheme:

The following additional expenses may be charged to the Scheme under Regulation 52 (6A), namely-

- Brokerage and transaction costs (including service tax) which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52. Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC.
- Expenses not exceeding of 0.30 % of daily net assets, if the new inflows from beyond top 15 cities are at least:
 - (i) 30 % of gross new inflows in the scheme; or
 - (ii) 15 % of the average assets under management (year to date) of the scheme; whichever is higher.
 Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis.

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

- Additional expenses upto 0.20% of daily net assets of the scheme, incurred towards different heads mentioned under Regulation 52 (2) and 52 (4).

Service Tax:

Service Tax on investment and advisory fees may be charged to the scheme in addition to the maximum limit of TER as prescribed in Regulation 52(6)©. Service tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit of TER as per Regulation 52.

The estimates are based on an amount of Rs. 100 crores for the Scheme and will change to the extent assets are lower or higher.

The aforesaid estimates are made in good faith by the Investment Manager and are subject to change inter se among the various heads of expenses and between the Plans. It may also be noted that the total expenses of the

Plans will also be subject to change within the overall limits of expenses under Regulation 52. Actual expenses under any head and / or the total expenses may be more or less than the estimates. The Investment Manager retains the right to charge the actual expenses to the Fund, however the expenses charged will not exceed the statutory limit prescribed by the Regulations. Any expenditure in excess of the limits specified in Regulation 52 shall be borne by the AMC. The differential portion of expenses if any, post charging of actual expenses will be adjusted in the investment management fee charged by the investment manager. There will be no sub limit on management fee, and it shall be within the overall TER specified above.

For the actual current expenses being charged, the investor may refer to the website of the mutual fund.

Illustration of impact of expense ratio on scheme return:

Assumed 1 year Simple Average Return of the Scheme before expenses	15%
Assumed Average TER Expense of the scheme for the year (%)	2%
Average Return after charging the expense	13%

Illustration is given to understand the impact of expense ratio on a scheme return and this should not be construed as an indicative return of the scheme.

C. Load Structure

Load is an amount which is paid by the investor to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website assetmanagement.kotak.com or may call at 1800-22-2626 or your distributor.

Entry Load*- Nil

Exit Load**- Nil

Any exit load charged (net off Service Tax, if any) shall be credited back to the Scheme.

Units issued on reinvestment of dividends shall not be subject to entry and exit load.

* In terms of SEBI Circular No. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009, no entry load will be charged on purchase / additional purchase / switch-in.
