II. INTRODUCTION

A Risk Factors

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Kotak Mahindra Gilt Unit Scheme 98 – Investment Plan is only name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.2,50,000 made by it towards setting up the Fund.
- The above mentioned schemes are not guaranteed or assured return schemes.

Scheme Specific Risk Factors

The Portfolio of Gilt Investment Plan will comprise predominantly of securities issued by the Central or State Government and to a lesser extent Reverse Repo. As such, there would be Zero-Credit Risk. Since there is no restriction on the maturity of the securities, there would be moderate to high price risk or interest rate risk.

Risks associated with Debt / Money Markets i.e. Markets in which Interest bearing Securities or Discounted Instruments are traded

(i) Credit Risk / Repayment Risk:

Securities carry a Credit risk of repayment of principal or interest by the borrower. This risk depends on micro-economic factors such as financial soundness and ability of the borrower as also macro-economic factors such as Industry performance, Competition from Imports, Competitiveness of Exports, Input costs, Trade barriers, Favourability of Foreign Currency conversion rates, etc.

Credit risks of most issuers of Debt securities are rated by Independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes.

The highest credit rating (i.e. lowest credit risk) commands a low yield for the borrower. Conversely, the lowest credit rated borrower can raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers lenders prefer higher rated instruments further justifying the lower yields.

(ii) Sovereign risk:

The Federal Government of a country (i.e. Central Govt. in case of India) is the issuer of the local currency in that country. The Government raises money to meet its Capital and Revenue expenditure by issuing Debt or Discounted Securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such Sovereign credit is near zero and is popularly known as "risk-free security" or "Zero-Risk security". Thus Zero-Risk is the lowest risk, even lower than a security with "AAA" rating and hence commands a yield, which is lower than a yield on "AAA" security.

(iii) Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill.

Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof.

Floating rate securities issued by a government (coupon linked to Treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

(iv) Risk of Rating Migration:

The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.50% p.a., its market value would drop to Rs. 98.76 (i.e. 1.24%) If the security is up-graded to AAA category which commands a market yield of, say, 9.60% p.a. its market value would increase to Rs103.48 (i.e. by 3.48%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.

Rating	Yield (% p.a.)	Market Value (Rs.)
AA	11.00	100.00
If upgraded to AAA	9.60	103.48
If downgraded to A	11.50	98.76

(v) Basis Risk:

During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve.

(vi) Spread Risk:

In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.

(vii) Reinvestment Risk:

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently the proceeds may get invested at a lower rate.

(viii) Liquidity Risk:

The corporate debt market is relatively illiquid vis-a- vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described elsewhere in the SAI. The approval from the AMC Board and the Trustees giving details of circumstances and justification for the proposed action shall also be informed to SEBI in advance.

B. Requirement of minimum investors in the scheme

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

II. INFORMATION ABOUT THE SCHEME

Kotak Mahindra Gilt Unit Scheme 98 – Investment Plan

A. Type of Scheme

An open ended dedicated Gilt Scheme

B. Features of the scheme (Investment Objective, Asset Allocation Pattern, Investment Strategy, Benchmark, Risk Mitigation)

Investment Objective	<p>The objective of the Plan is to generate risk-free returns through investments in sovereign securities issued by the Central Government and/or State Government(s) and/or any security unconditionally guaranteed by the Government of India, and/or reverse repos in such securities as and when permitted by RBI. A small portion of the fund may be invested in the inter-bank money market in order to meet the day-to-day liquidity requirements of the Plan. To ensure total safety of Unitholders' funds, the Plan does not invest in any other securities such as shares, debentures or bonds issued by any other entity. The Fund will seek to underwrite issuance of Government Securities if and to the extent permitted by SEBI/RBI and subject to the prevailing rules and regulations specified in this respect and may also participate in their auction from time to time.</p> <p>Subject to the maximum amount permitted from time to time, the Plan may invest in securities abroad, in the manner allowed by SEBI/RBI in conformity with the guidelines, rules and regulations in this respect. The Fund will seek permission to invest in government securities issued by G-7 nations, provided that such securities are considered as Investment Grade and provided RBI permits such Investment under the guidelines for a dedicated Gilts Fund.</p> <p>There is no assurance that the investment objective of the Plan will be achieved. It is however emphasized, that investments under the Plan are made in Government Securities, where there is no risk of default of payment in principal or interest amount.</p>																	
Asset Allocation	<p>The following table indicates, by maturity and category, the risks associated with Government Securities. :</p> <table border="1" data-bbox="459 1444 1177 1720"> <thead> <tr> <th rowspan="2">Balance Maturity</th> <th colspan="2">Risk Profile</th> </tr> <tr> <th>Price Risk</th> <th>Credit Risk</th> </tr> </thead> <tbody> <tr> <td>More than 5 years</td> <td>Low</td> <td>Zero</td> </tr> <tr> <td>Between 1 to 5 years</td> <td>Lower</td> <td>Zero</td> </tr> <tr> <td>Less than 1 year</td> <td>Lowest</td> <td>Zero</td> </tr> <tr> <td>Securities held under Reverse Repos</td> <td>Zero</td> <td>Very low</td> </tr> </tbody> </table> <p>The risk profile described above indicates that the risks of a portfolio of Government Securities are invariably lower than those of a portfolio of investments of other types of securities. Since Government Securities do not pose any credit risk, they are usually referred to as risk-free securities. There will no restriction on maturity of the securities.</p>	Balance Maturity	Risk Profile		Price Risk	Credit Risk	More than 5 years	Low	Zero	Between 1 to 5 years	Lower	Zero	Less than 1 year	Lowest	Zero	Securities held under Reverse Repos	Zero	Very low
Balance Maturity	Risk Profile																	
	Price Risk	Credit Risk																
More than 5 years	Low	Zero																
Between 1 to 5 years	Lower	Zero																
Less than 1 year	Lowest	Zero																
Securities held under Reverse Repos	Zero	Very low																
Investment Strategy and Risk Control Measures	<p>The Plan predominantly invests in government securities, without any restriction on the maturity of the portfolio.</p>																	

Liquidity Support from RBI	<p>Being a Plan dedicated exclusively to investments in Government Securities, the Fund can avail liquidity support of upto 20% of the outstanding value of its investments in Government Securities at the close of the previous Working Day. This facility has been made available by RBI under its Guidelines. Liquidity support under these guidelines is by way of outright sale of Government Securities by the Plan to RBI as well as by way of repo.</p> <p>To avoid duplication of portfolios and to reduce expenses, the Plan may invest in any other scheme of the Fund to the extent permitted by the Regulations. In such an event, as per the Regulations, the AMC cannot charge management fees on the amounts of the Plan so invested.</p>
Benchmark	<p>The performance of Kotak Gilt Investment Plan is benchmarked against the I-Sec Composite Index.</p> <p>The composition of the aforesaid benchmark is such that, it is most suited for comparing the performance of the scheme.</p> <p>The Trustees reserves right to change benchmark in future for measuring performance of the scheme.</p>
Risk Mitigation	<p>Risk control measures for investment strategy</p> <p>The fund will comply with the prescribed SEBI limits on exposure. Risk is monitored at periodic intervals and the portfolio is rebalanced within the specified time period in case of any deviations.</p> <p>Risk mitigation measures for portfolio volatility</p> <p>The portfolio volatility is managed in line with the objective of scheme. Internal caps on average maturity are defined to keep volatility on account of interest rate risk minimal. The scheme also invests predominantly in government securities which don't carry credit risk thereby eliminating the resultant volatility. Portfolio volatility is monitored on a periodic basis relative to the benchmark and the peer set.</p> <p>Risk mitigation measures for managing liquidity</p> <p>The scheme invests predominantly in government securities which are actively traded and thereby liquid. Reasonable investments are made at the shorter end of the yield curve which is the most actively traded segment in the secondary market. This would help to manage daily liquidity.</p>

Overview of Debt Market

The Indian Debt Market has grown in size substantially over the years. The Reserve Bank of India has been taking steps to make the Indian Debt Market efficient and vibrant. The interest rates were regulated till a few years back, there has been rapid deregulation and currently both the lending and deposit rates are market determined. The Central banker has in its recent credit policy meetings suggested the importance of a fully developed corporate bond market and efforts are being made to have an online trading platform for corporate bonds.

Broadly, the debt market is divided in two parts viz. the Money Market and the Debt market. Money market instruments have a tenor of less than one year while debt market instruments have a tenor of more than one year. Money market instruments are typically commercial paper, certificates of deposit, treasury bills, trade bills, repos, interbank call deposit receipts etc. Debt market comprises typically of securities issued by Governments (Central and State), Banks, Financial Institutions, and Companies in the private and public sector, Corporations, Statutory Bodies etc.

The debt securities are mainly traded over the telephone directly or through brokers. The National Stock Exchange of India has a separate trading platform called the Wholesale Debt Market segment where trades put through member brokers are reported. The daily volumes in the debt market are in the region of Rs.2500-5000 crores. –

RBI has introduced the Negotiated Dealing System (NDS) platform for screen-based trading in Government Securities and Money Market instruments. Most of the market participants are now operating through NDS. Promoted by major banks and financial institutions, The Clearing Corporation of India Ltd. (CCIL), was incorporated on April 30, 2001. The CCIL guarantees the settlement of all trades executed through NDS. The clearing and settlement risks viz., Counter party Credit Risk and Operational Risk are mitigated by CCIL thereby facilitating a smooth settlement process.

The following table gives approximate yields prevailing as on June 20, 2017 on some of the money and debt market instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing.

Instrument	Yield Range (% per annum)
Inter bank Call Money	6.20 - 6.25
91 Day Treasury Bill	6.25 – 6.30
364 Day Treasury Bill	6.35 – 6.40
P1+ Commercial Paper 90 Days	6.35 – 6.40
3-Year Government of India Security	6.45 – 6.49
5-Year Government of India Security	6.54 – 6.60
10-Year Government of India Security	6.40 – 6.45

Generally, for instruments issued by a non-Government entity, the yield is higher than the yield on a Government Security with corresponding maturity. The difference, known as credit spread, depends on the credit rating of the entity. Investors must note that the yields shown above are the yields prevailing on June 20, 2017, and they are likely to change consequent to changes in economic conditions and RBI policy.

C. Where will the scheme invest?

Subject to the Regulations, the amount collected under the scheme can be invested in any (but not exclusively) of the following securities/ instruments, as per the indicative asset allocation given under the heading “How will the Scheme allocate its assets”:

In accordance with SEBI circular no. CIR / IMD / DF / 19 / 2011 dated November 11, 2011 and CIR/IMD/DF/23/2012 dated November 15, 2012; schemes of Kotak Mahindra Mutual Fund (KMMF) shall participate in the corporate bond repo transactions w.e.f. June 21, 2013 as per the guidelines issued by Reserve Bank of India (RBI) from time to time. Currently the applicable guidelines are as under:

- The gross exposure of the scheme to repo transactions in corporate debt securities shall not be more than 10 % of the net assets of the concerned scheme.
- The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt and derivatives shall not exceed 100% of the net assets of the concerned scheme.
- Mutual Funds shall participate in repo transactions only in AA and above rated corporate debt securities.
- In terms of Regulation 44 (2) mutual funds shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months

The investment restrictions applicable to the Scheme's participation in the corporate bond repos will also be as prescribed or varied by SEBI or by the Board of Kotak Mahindra Trustee Company Limited (subject to SEBI requirements) from time to time.

The following guidelines shall be followed by Kotak Mahindra Mutual Fund for participating in repo in corporate debt securities, which have been approved by the Board of AMC and Trustee Company.

(i) Category of counterparty to be considered for making investment:

All entities eligible for transacting in corporate bond repos as defined by SEBI and RBI shall be considered for repo transactions.

(ii) Credit rating of counterparty to be considered for making investment

The schemes shall participate in corporate bond repo transactions with counterparties having a minimum investment grade rating and is approved by the Investment Committee on a case-to-case basis. In case there is no rating available, the Investment Committee will decide the rating of the counterparty, and report the same to the Board from time to time.

(iii) Tenor of Repo and collateral

As a repo seller, the schemes will borrow cash for a period not exceeding 6 months or as per extant regulations.

As a repo buyer, the Schemes are allowed to undertake the transactions for maximum maturity upto one year or such other terms as may be approved by the Investment Committee.

There shall be no restriction / limitation on the tenor of collateral.

(iv) Applicable haircuts

As per RBI circular RBI/2012-13/365 IDMD.PCD. 09 /14.03.02/2012-13 dated 07/01/2013, all corporate bond repo transaction will be subject to a minimum haircut given as given below:

- (1) AAA : 07.50%
- (2) AA+ : 08.50%
- (3) AA : 10.00%

The haircut will be applicable on the prevailing market value of the said security on the prevailing on the date of trade. However, the fund manager may ask for a higher haircut (while lending) or give a higher haircut (while borrowing) depending on the market prevailing liquidity situation.

Risk envisaged and mitigation measures for repo transactions:

Credit risks could arise if the counterparty does not return the security as contracted or interest received by the counter party on due date. This risk is largely mitigated, as the choice of counterparties is largely restricted and their credit rating is taken into account before entering into such transactions. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to us. Thus the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

Systematic Withdrawal Plan:

This facility enables the Unitholders to withdraw (subject to deduction of tax at source, if any) sums from their investments in the Scheme at periodic intervals through a one-time request. The withdrawals can be made either Monthly (on 1st, 7th, 14th, 21st or 25th of every month) or Quarterly (on 1st, 7th, 14th, 21st or 25th, as the case may be. In case any of these days fall on non-business day the transaction will be effected on the next business day of the scheme. SWP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of SWP. In case the SWP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the SWP registration request received for a period lesser than 7 days in the interest of unit holders.

Example: for Monthly SWP if the SWP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this SWP will be from 7th February onwards.

This facility is available in two options to the Unitholders:

Fixed Option: Under this option, the Unitholder can seek redemption of a fixed amount of not less than Rs. 1000 from his Unit account. In this option the withdrawals will commence from the Start Date (being one of the dates indicated above) mentioned by the Unitholder in the Application Form for the facility. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. If the net asset value of the units outstanding on the withdrawal date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs 1000 after processing of the last SWP installment then the entire amount will be processed along the last SWP installment.

Appreciation Option: Under this option, the Unitholder can seek redemption of an amount equal to a periodic appreciation on the investment.

The Unitholder redeems only such number of Units, which when multiplied by the Applicable NAV is, in amount terms equal to the appreciation in his investment over the last month / quarter.

The investor would need to indicate in his systematic withdrawal request, the commencement / start date from which the appreciation in investment value should be computed. The withdrawal will commence after one month/quarter (as requested by the investor) from the commencement / start date mentioned by the Unitholder in the Application Form and can, at the investor's discretion be on 1st, 7th, 14th, 21st or 25th of the month / quarter.

The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. In case the investor purchases additional Units, the withdrawal amount would include the appreciation generated on such Units as well. In the absence of any appreciation, the redemption under this option will not be made.

For both fixed and appreciation option the provision of minimum redemption amount / units will not be applicable for redemption made under this facility.

Systematic Transfer Plan (STP)

This facility enables the Unitholders to switch an amount from their existing investments in a Scheme/Plan/Option to another Scheme/Plan/Option of the Fund, which is available for investment at that time, at periodic intervals through a one-time request. The switch can be made weekly, monthly or quarterly. Under this facility the switch by the Unitholders should be within the same account/ folio number. The withdrawals can be made either Weekly or Monthly (on any business day) or Quarterly (on any business day). The amount so switched shall be reinvested in the other scheme / plan and accordingly, to be effective, the systematic transfer must comply with the redemption rules of transferor scheme and the issue rules of transferee scheme (e.g. exit / entry load etc)

STP registration needs to be submitted to the Registrar/ AMC 7 days prior to the date of commencement of STP. In case the STP commencement date is less than 7 days from the date of submission of registration form and the date opted for, then the same would be registered for the next cycle. The AMC reserves the right to process the STP registration request received for a period lesser than 7 days in the interest of unit holders.

Example: for Monthly STP if the STP date opted is 7th of every month from 7th January and submitted on 3rd January then the registration of this STP will be from 7th February onwards.

This facility offers two options to the Unitholders:

Fixed Option: Under this option, the Unitholder can switch fixed amount of not less than Rs. 1000/- from his Unit account. In this option the switch will commence from the Start Date mentioned by the Unitholder in the application form for the facility. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought will be created at the Applicable NAV of such Scheme/Plan/Option on the respective dates. If the net asset value of the units outstanding on the transfer date is insufficient to process the withdrawal request, then the entire outstanding units will be processed. And if the available balance falls below Rs 1000 after processing of the last STP installment, then the entire amount will be processed along the last STP installment.

Appreciation Option: Under this option, the Unitholder can seek switch of an amount equal to the periodic appreciation on the investment. Under this option the Unit holder switches only proportionate number of Units, which when multiplied by the applicable NAV is, in amount terms equal to the appreciation in the investment over the last month/quarter.

For both Fixed and appreciation option the provision of minimum redemption and minimum investment amount / units will not be applicable for transfer / switch transactions made under this facility for both switch out and switch in schemes.

The investor has to mention a "Start Date". The first switch will happen after one month/quarter from the start date. In case the investor purchases additional Units, the amount to be switched would be equal to the appreciation generated

on such Units. In the absence of any appreciation as mentioned above, the switch under this option will not be made. The Units in the Scheme/Plan/Option from which the switch - out is sought will be redeemed at the Applicable NAV of the Scheme/Plan/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Plan/Option to which the switch - in is sought will be allotted at the Applicable NAV of such Scheme/Plan/Option on the respective dates.

Dividend Transfer Plan (DTP):

Dividend Transfer Plan (DTP) is a facility whereby the unit holders under the Dividend Options (other than Daily Reinvestment Sub-option) of the open ended Schemes of KMMF can opt to transfer their dividends to any other Investment option (other than Daily Reinvestment Sub-option) under any other open ended schemes of KMMF. DTP facility will be available to unit holder(s) holding units in non-demat form under the Dividend Option of the Transferor Schemes.

Under the DTP facility investors cannot transfer their dividends into certain category of transferee schemes viz, close ended Schemes, Exchange Traded Funds (ETFs), and Kotak Tax Saver Scheme.

Under DTP, dividend as & when declared (as reduced by the amount of applicable statutory levy) in the transferor scheme (subject to minimum of Rs.500/-) will be automatically invested without any exit load into the transferee scheme, as opted by the Unit holder. Such transfer will be treated as fresh subscription in the transferee scheme and invested at the Applicable NAV of the Transferee Scheme. If the dividend amount in the Transferor Scheme is less than Rs.500/- the dividend will be automatically reinvested in the Transferor Scheme itself and hence will not be transferred. The provision for 'Minimum Application Amount' specified in the respective transferee scheme's SID will not be applicable under DTP.

Enrolment under the DTP facility will automatically override any previous instructions for 'Dividend Payout' or 'Dividend Reinvestment' option in the transferor scheme. No Exit Load will be levied on units allotted in the Transferee Scheme under the Dividend Transfer Plan.

Unit holders who wish to enroll for the DTP facility are required to fill DTP Enrollment Form available with the ISC's, distributors/ agents and also available on the website www.assetmanagement.kotak.com

The request for enrolment or cancellation for DTP must be submitted at least 7 days prior to the Record Date for the dividend. In case of the condition not being met, the enrolment would be considered valid from the immediately succeeding Record Date of the dividend, provided the difference between the date of receipt of a valid application for enrolment under DTP and the next Record Date for the dividend is not less than 7 days.

The AMC / Trustee reserve the right to change/ modify the terms and conditions of the DTP on a prospective basis.

C. Computation of NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

The Fund shall value its investments according to the valuation norms, as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

NAV of Units under the Scheme will be calculated as shown below:

NAV=	Market or Fair Value of Scheme's investments	+	Current assets including Income	Accrued	-	Current Liabilities and provisions including accrued expenses
	No. of Units outstanding under the Scheme/Option.					

NAV for the Scheme and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto four decimals for each scheme

Computation of NAV will be done after taking into account dividends paid, if any, and the distribution tax thereon, if applicable. Therefore, once dividends are distributed under the Dividend Option, the NAV of the Units under the Dividend Option would always remain lower than the NAV of the Units issued under the Growth Option. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.
