## **A. Risk Factors**

### **Standard Risk Factors:**

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Kotak Banking ETF is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.2,50,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

### **Scheme Specific Risk Factors**

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV trading price, yield, total return and/or its ability to meet its objectives.

1. The NAV of the units is closely related to the value of stocks that form a part of the benchmark index. The value of this will react to stock market movements and may result in changes in the NAV of units under the scheme. There could also be movements in the scheme's NAV due to changes in interest rates, macro economic and political developments and over longer periods during market downturns
2. Liquidity Risk: Trading in Kotak Banking ETF may be halted due to market conditions or for reasons that in the view of the Exchange Authorities or SEBI, trading in Kotak Banking ETF is not advisable. There could also be trading halts caused by extraordinary market volatility and pursuant to NSE and SEBI circuit filter rules. There can be no assurance that the requirements of the exchange necessary to maintain the listing of the Kotak Banking ETF will continue to be met or will remain unchanged
3. Regulatory Risk: Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Authorised Participant to arbitrage resulting into wider premium/ discount to NAV.
4. Sector Risk: The banking sector in general could under perform returns from the securities or other asset classes.
5. As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme is a passively managed scheme and provides exposure to the benchmark and tracking its performance and yield as closely as possible. The Schemes

performance may be affected by a general price decline in the stock markets. The Scheme invests in the stocks comprising the index regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets.

6. As the scheme proposes to invest not less than 95% of the net assets in securities comprising of Nifty Bank Index, any deletion of stocks from or addition to in Nifty Bank Index may require sudden and immediate liquidation or acquisition of such stocks at the prevailing market prices irrespective of whether valuation of stocks is attractive enough. This may not always be in the interest of unitholders.
7. The scheme will attract provisions of take over regulations, if it invests in more than 10% of the paid up capital of a company and therefore may not be able to accept further subscriptions.
8. The performance of the Nifty Bank Index will have a direct bearing on the performance of the scheme. Hence any composition change by virtue of weightage or stocks selection will have an impact on the scheme.
9. Though Kotak Banking ETF is listed on the stock exchange, there is no assurance that an active secondary market will develop or be maintained.
10. Tracking error may have an impact on the performance of the scheme. However KMAMC will endeavour to keep the tracking error as low as possible.
11. Investors may note that even though this is an open-ended scheme, they will have to buy or sell units of the scheme on the stock exchanges where these units are listed for liquidity at the market price, subject to the rules and regulations of the exchange. Buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.
12. The market price of ETF units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. However since the eligible investors can transact with the AMC for units beyond the creation unit size there should not be a significant variance from the NAV. Hence the price of ETF is less likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.
13. Capital Gains Impact: Investors who trade in Kotak Banking ETF may be subject to Long Term Capital Gains or Short Term Capital Gains. Investors are requested to consult their tax / legal consultants before investing in the scheme.

The units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund depends up on the confirmations to be received from depository (ies) on which the mutual fund has no control.

#### **Risk related to ETF:**

- a. Absence of Prior Active Market: Although the units of ETFs are listed on the Stock Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.
- b. Lack of Market Liquidity: Trading in units of ETFs on the Stock Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned Stock Exchange or Market Regulator, trading in the ETF Units is inadvisable. In addition, trading in the units of ETFs is subject to trading halts caused by extraordinary market volatility pursuant to 'circuit breaker' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of ETFs will continue to be met or will remain unchanged.

- c. Units of Exchange Traded Funds May Trade at Prices Other than NAV: Units of Exchange Traded Funds may trade above or below their NAV. The NAV of Units of Exchange Traded Funds may fluctuate with changes in the market value of a Scheme's holdings. The trading prices of units of ETF will fluctuate in accordance with changes in their NAVs as well as market supply and demand. However, given that ETFs can be created / redeemed in Creation Units, directly with the fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.
- d. Regulatory Risk: Any changes in trading regulations by the Exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV. Although Kotak Banking ETF is proposed to be listed on Exchange, the AMC and the Trustees will not be liable for delay in listing of Units of the Scheme on Exchange / or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- e. Political Risks: Whereas the Indian market was formerly restrictive, a process of deregulation has been taking place over recent years. This process has involved removal of trade barriers and protectionist measures, which could adversely affect the value of investments. It is possible that the future changes in the Indian political situation, including political, social or economic instability, diplomatic developments and changes in laws and regulations could have an effect on the value of investments. Expropriation, confiscatory taxation or other relevant developments could affect the value of investments.
- f. Competition Risks: An investment in Kotak Banking ETF may be adversely affected by competition from other methods of investing in the Bank Index.
- g. Right to Limit Redemptions: The Trustee, in the general interest of the unit holders of the Scheme offered under this Offer Document and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day depending on the total "Saleable Underlying Stock" available with the fund.
- h. Redemption Risk – The Unit Holders may note that even though this is an open ended scheme, the Scheme would ordinarily repurchase Units in Creation Unit size. Thus unit holdings less than the Creation Unit size can normally only be sold through the secondary market unless no quotes are available on the Exchange for 3 trading days consecutively.
- i. Asset Class Risk: The returns from the types of securities in which a Scheme invests may under perform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.
- j. Passive Investments: As Kotak Banking ETF is not actively managed, the underlying Investments may be affected by a general decline in the Indian markets relating to its Underlying Index. The scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.
- k. Tracking Error Risk: Factors such as the fees and expenses of the Scheme, cash balance, changes to the Underlying assets and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying assets of the scheme. The Scheme's returns may therefore deviate from those of its Underlying assets.

1. Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the Creation / Redemption of units through the in-kind mechanism the fund can keep lesser funds in cash. Also, time lag between buying / selling units and the underlying shares is much lower. The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However this may vary when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

### **Risk specific to investing in companies forming part of Nifty Bank Index**

Nifty Bank Index is a Sectoral index and the Fund will seek to invest in companies belonging to a specific sector. This will limit the capability of the Fund to invest in other sectors. The Index being sector specific will be affected by the risks associated with the banking sector such as fiscal and monetary, regulatory changes, interest rate environment, business cycle, capital requirement, competition etc..

Also, as with all equity investing, there is the risk that companies in that specific sector will not achieve its expected earnings results, or that an unexpected change in the market or within the company may occur, both of which may adversely affect investment results. Thus investing in a sector specific fund could involve potentially greater volatility and risk.

### **Risks associated with investments in Derivative Instruments:**

As and when the Scheme trades in derivative market, there are risk factors and issues concerning the use of derivatives that the investors should understand.

Derivative products are specialized instrument that require investment technique and risk analysis different from those associated with stocks. The use of derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivative requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "Counter party") to comply with the terms of the derivative contract. Other risks in using derivative include the risk of mispricing or improper valuation of derivative and the inability of derivative to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. The risk of loss associated with futures contracts is potentially unlimited due to the low margin deposits required and the extremely high degree of leverage involved in futures pricing. As a result, a relatively small price movement in a futures contract may result in an immediate and substantial loss or gain. There may be a cost attached to selling or buying futures or other derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling underlying securities. The possible lack of a liquid secondary market for a futures contract or listed option may result in inability to close futures or listed option positions prior to their maturity date.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of the Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

The risk associated with the use of derivatives are different from or possibility greater than the risks associated with investing directly in securities and other traditional investments.

**Risks associated with Capital Markets or Equity Markets (i.e. Markets in which Equity Shares or Equity oriented instruments are issued and traded)**

- **Price fluctuations and Volatility:**

Mutual Funds, like securities investments, are subject to market and other risks and there can be neither a guarantee against loss resulting from an investment in the Scheme nor any assurance that the objective of the Scheme will be achieved. The NAV of the Units issued under the Scheme can go up or down because of various factors that affect the capital market in general, such as, but not limited to, changes in interest rates, government policy and volatility in the capital markets. Pressure on the exchange rate of the Rupee may also affect security prices.

- **Concentration / Sector Risk:**

When a Mutual Fund Scheme, by mandate, restricts its investments only to a particular sector; there arises a risk called concentration risk. If the sector, for any reason, fails to perform, the portfolio value will plummet and the Investment Manager will not be able to diversify the investment in any other sector.

- **Liquidity Risks:**

Liquidity in Equity investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities. These factors can also affect the time taken by KMMF for redemption of Units, which could be significant in the event of receipt of a very large number of redemption requests or very large value redemption requests. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information.

**Risks associated with Debt / Money Markets (i.e. Markets in which Interest bearing Securities or Discounted Instruments are traded)**

Kotak Banking ETF invests not less than 95% its corpus in the securities representing Nifty Bank Index. As this scheme endeavors to earn returns that closely correspond to the total returns represented by Nifty Bank Index, the scheme will have insignificant cash or debt/ market investments. Therefore, the scheme is not significantly susceptible to risks associated with debt/ money markets.

**B. Requirement of Minimum Investors in the Scheme**

In accordance with SEBI/IMD/CIR No. 10/22701/03 dated December 12, 2003 the requirement of minimum number of investors in the scheme is not applicable to Kotak Banking ETF.

**C. Special Considerations**

- Prospective investors should review/study SAI along with SID carefully and in its entirety and shall not construe the contents hereof or regard the summaries contained herein as advice relating to legal, taxation, or financial/investment matters and are advised to consult their own professional advisor(s) as to the legal or any other requirements or restrictions relating to the subscriptions, gifting, acquisition, holding, disposal (sale, transfer, switch or redemption or conversion into money) of units and to the treatment of income (if any), capitalization, capital gains, any distribution, and other tax consequences relevant to their subscription, acquisition,

holding, capitalization, disposal (sale, transfer, switch or redemption or conversion into money) of units within their jurisdiction/nationality, residence, domicile etc. or under the laws of any jurisdiction to which they or any managed Funds to be used to purchase/gift units are subject, and also to determine possible legal, tax, financial or other consequences of subscribing/gifting to, purchasing or holding units before making an application for units.

- Neither this SID and SAI, nor the units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or subject to registration and accordingly, any person who gets possession of this SID is required to inform themselves about, and to observe, any such restrictions. It is the responsibility of any persons in possession of this SID and any persons wishing to apply for units pursuant to this SID to inform themselves of and to observe, all applicable laws and Regulations of such relevant jurisdiction. Any changes in SEBI/NSE/RBI regulations and other applicable laws/regulations could have an effect on such investments and valuation thereof.
- Kotak Mahindra Mutual Fund/AMC has not authorised any person to give any information or make any representations, either oral or written, not stated in this SID in connection with issue of units under the Schemes. Prospective investors are advised not to rely upon any information or representations not incorporated in the SAI and SID as the same have not been authorised by the Fund or the AMC. Any purchase or redemption made by any person on the basis of statements or representations which are not contained in this SID or which are not consistent with the information contained herein shall be solely at the risk of the investor. The investor is requested to check the credentials of the individual, firm or other entity he/she is entrusting his/her application form and payment to, for any transaction with the Fund. The Fund shall not be responsible for any acts done by the intermediaries representing or purportedly representing such investor.
- If the units are held by any person in breach of the Regulations, law or requirements of any governmental, statutory authority including, without limitation, Exchange Control Regulations, the Fund may mandatorily redeem all the units of any Unit holder where the units are held by a Unit holder in breach of the same. The Trustee may further mandatorily redeem units of any Unit holder in the event it is found that the Unit holder has submitted information either in the application or otherwise that is false, misleading or incomplete.
- If a Unit holder makes a redemption request immediately after purchase of units, the Fund shall have a right to withhold the redemption request till sufficient time has elapsed to ensure that the amount remitted by the Unit holder (for purchase of units) is realized and the proceeds have been credited to the Scheme's Account. However, this is only applicable if the value of redemption is such that some or all of the freshly purchased units may have to be redeemed to effect the full redemption.
- In terms of the Prevention of Money Laundering Act, 2002 ("PMLA") the rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering (AML) Laws, all intermediaries, including mutual funds, are required to formulate and implement a client identification programme, and to verify and maintain the record of identity and address(es) of investors.
- If after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, the AMC shall report any such suspicious transactions to competent authorities under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI, furnish any such information in connection therewith to such authorities and take any other actions as may be required for the purposes of fulfilling its obligations under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI without obtaining the prior approval of the investor/Unit holder/any other person.

The following three types of investors may subscribe to the units of the scheme: there are some restrictions on their dealing with the Fund directly during the continuous offer as explained below:

1. **Authorised Participants (AP) (whose name will be available on the website of the Fund assetmanagement.kotak.com):** AP is an entity engaged by AMC to undertake the responsibility of a market maker and ensure liquidity in the stock market. The role of AP will endeavour to assure liquidity for Kotak Banking ETF units in the stock exchanges where the units are listed.
2. **Large Investors (LI):** LI may buy and redeem units in creation unit size directly from the Fund directly on any business day at applicable NAV price plus transaction charges, as and when permitted by the AMC.
3. **Other Investors:** Investors other than AP and LI may buy or sell Kotak Banking ETF units from the stock market only, on an ongoing basis.

#### 1. **Requirement of Demat account for investing in the scheme**

The applicant under the Scheme will be required to have a beneficiary account with a Depository Participant of NSDL/CDSL and will be required to indicate in the application the Depository Participants (DP's) name, DP ID Number and the beneficiary account number of the applicant.

#### 2. **Procedure for Purchase/Redemption of Units directly from the Fund:**

Only Authorised Participants can purchase or redeem unit directly from the Fund as per the procedure given below:

##### **a. Creation/Redemption of units in Creation Unit Size by Exchanging Portfolio Deposit**

The Fund creates / redeems the scheme units in large size known as "Creation Unit". The value of the "Creation Unit" is 15000 units of the Scheme or in multiple thereof called as the "Portfolio Deposit" and a "Cash Component" which will be exchanged for corresponding number of units. The Portfolio Deposit and Cash Component may change from time to time and will be announced by Fund on its website. Portfolio deposit shall be made into a pre-designated depository account.

Payment of proceeds in cash: The Fund at its discretion may accept the request of AP/LI for payment of redemption proceeds in cash. Such investors shall make redemption request to the Fund whereupon the Fund will arrange to sell underlying portfolio securities on behalf of the investor. Accordingly, the sale proceeds of portfolio securities, after adjusting necessary charges/costs, will be remitted to the investor. The number of Units so redeemed will be subtracted from the unitholder's account balance (DP) and a statement to this effect will be issued to the unitholder by depository.

##### **b. Procedure for Creating Scheme's units in Creation Unit Size**

AP may deposit requisite basket of securities comprising Nifty Bank Index constituting the Portfolio Deposit and Cash component. The requisite securities constituting the Portfolio Deposit have to be transferred to the designated depository account of the scheme while the Cash Component has to be paid to the AMC by way of a cheque or pay order or demand draft. The AMC will have the corresponding number of units credited to the depository account of the AP.

The Portfolio Deposit and Cash Component for the Scheme may change from time to time due to change in NAV.

### c. Procedure for Redeeming Scheme's units in Creation Unit Size

AP may submit Redemption request transaction form prescribed by the AMC enclosed with redemption request slip used in the depository system duly acknowledged by the depository participant with which AP has a depository account.

The Portfolio Deposit and Cash Component for the Scheme may change from time to time due to change in NAV.

The number of units cannot be fractional and will be rounded off to the earlier decimal but this will be done investor wise and not just at the scheme level.

Also, the incidental expenses of brokerage, STT, STP charges and NSDL charges would be recovered from the investor.

### Allotment of units and fractional units

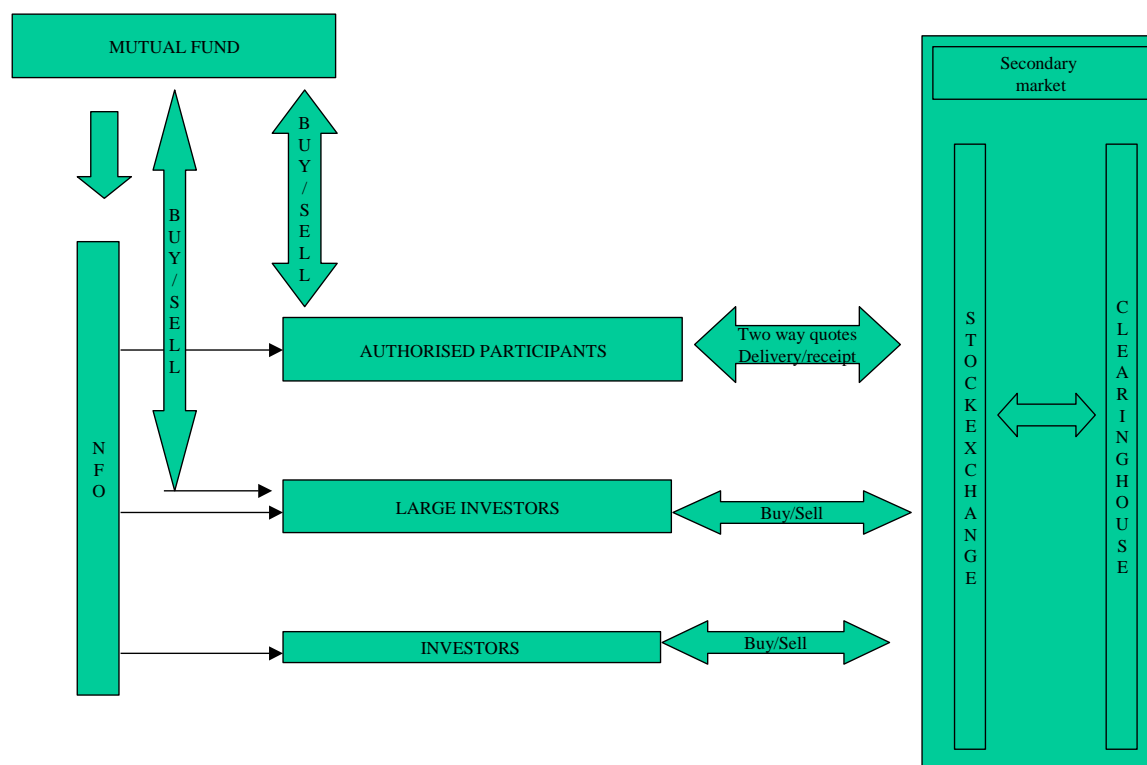

Stock exchanges may not allow trading of fractional units. Trustees may, with a view to avoid creation of fractional units, decide to allot units only in integers by rounding off the units allotted to the lower integer and the balance will be refunded to the investor.

The above procedure relating to purchase and sale of units by different types of investors/participants in the scheme is tabulated for easy reference

Type of investor and transaction details	Sale of units by Mutual Fund	Redemption of units by unit holders
<b>During Continuous offer</b>		
Authorized Participants	Any business day in creation unit* Size at applicable NAV and transaction handling charges.	Any business day in creation unit* Size
Large Investor	Any business day in creation unit* Size at applicable NAV and transaction handling charges.	Any business day in creation unit* Size
Other investors	Only through stock exchange	Only through stock exchange
<b>Role of Authorised participants</b>	Gives two way quotes in the secondary market. Stands as a seller for a buy order.	Gives two-way quotes in the secondary market. Stands as a buyer against a sell order.
<b>Role of large investor</b>	Only an investor – no other role in the scheme operations.	

**\* Creation unit**

Each creation unit consists of 15,000 units of Kotak Banking ETF.

**Each unit of Kotak Banking ETF will be approximately equal to 1/100<sup>th</sup> of the value of the Nifty Bank Index.**

**d. Redemption method:**

- Unitholder (large investor or authorized participant) may submit to any of the offices of AMC Redemption request Form enclosed with a copy of redemption request duly acknowledged by the depository participant.
- The depository participant will process the request and forward the same to Registrar to the Scheme in the normal course.
- The time taken for confirmation of repurchase of units is dependent upon the timelines and procedures of depositories.
- Redemption proceeds in the form of Portfolio of securities will be transferred to the demat account of the unit holder within three days of confirmation with the depository records.

**e. Exit opportunity in case of ETF for investors other than Authorised Participants and Large Investors:**

Investors other than Authorised Participants and Large Investors can directly approach the Fund for redemption of units, and no exit load will be charged if-

- a. Traded price of the ETF units is at discount of more than 3% for continuous 30 days, or
- b. Discount of bid price to NAV over a period of 7 consecutive days is greater than 3%, or
- c. No quotes are available on exchange for 3 consecutive trading days, or
- d. Total bid size on the exchange is less than half of creation units size daily, averaged over a period of 7 consecutive trading days.

In such a scenario valid applications received upto 3 p.m. the Mutual Fund shall process the redemption request basis the closing NAV of the day of receipt of application.

**f. Buying /Selling through the Stock Exchange**

Buying / Selling units on the stock exchange is just like buying / selling any other normal listed securities. If an investor has bought units, an investor has to pay the purchase amount to the broker / sub-broker such that the amount paid is realised before the funds pay-in day of the settlement cycle on the exchange. If an investor has sold units, an investor has to deliver the units to the broker/sub-broker before the securities pay-in day of the settlement cycle on the exchange. The units (in case of units bought) and the funds (in the case of units sold) are paid out to the broker on the payout day of the settlement cycle on the exchange. The trading member would pay the money or deliver the units to the investor in accordance with time prescribed by the stock exchange regulations.

If an investor has bought units, he should give standing instructions for 'Delivery-In' to his/her DP for accepting units in his/her beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her DP to his/her trading member. The trading member will transfer the units directly to his/her beneficiary account on receipt of the same from exchange's clearing corporation.

An investor who has sold units should instruct his/her Depository Participant (DP) to give 'Delivery Out' instructions to transfer the units from his/her trading member through whom he/she have sold the units. The details of the pool A/c of his/her trading member to which the units are to be transferred, unit quantity etc. should be mentioned in the delivery out instructions given by him/her to the DP. The instructions should be given well before the prescribed securities pay-in day. SEBI has advised that

the delivery out instructions should be given atleast 24 hours prior to the cut off time for the prescribed securities pay in to avoid any rejection of instructions due to data entry errors, network problems, etc.

## B. INFORMATION ABOUT THE SCHEME

### Kotak Banking ETF

#### A. Type of the scheme

An open ended exchange traded fund

#### B. What is the investment objective of the scheme?

The investment objective of the scheme is to provide returns before expenses that closely correspond to the total returns of the Nifty Bank Index subject to tracking errors.

**There is no assurance that the investment objective of the Scheme will be achieved.**

#### Tracking Error

Tracking error means the extent to which the NAV of the fund moves in a manner inconsistent with the movements of the benchmark index on any given day or over any given period of time due to any cause or reason whatsoever including but not limited to expenditure incurred by the scheme, dividend payouts if any, whole cash not invested at all times as it may keep a portion of funds in cash to meet redemption etc.

Tracking error could be the result of a variety of factors including but not limited to:

- a. Delay in the purchase or sale of stocks within the benchmark due to
  - i. Illiquidity in the stock,
  - ii. Delay in realisation of sale proceeds,
- b. The scheme may buy or sell the stocks comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- c. The potential for trades to fail, which may result in the Scheme not having acquired the stocks at a price necessary to track the benchmark price.
- d. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- e. Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
- f. Execution of large buy / sell orders
- g. Transaction cost and recurring expenses
- h. Realisation of Unit holders' funds

#### C. How will the scheme allocate its assets?

The asset allocation under the Scheme, under normal circumstances, is as follows:

Investments	Indicative Allocation (% to net assets)	Risk Profile
Stocks comprising Nifty Bank Index*	95% to 100%	Medium to High
Cash and debt/money market instruments**	0% to 5%	Low

\*Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. The gross position to such derivatives will be restricted to 5% of net assets of the scheme.

\*\* Investment in Debt instruments(for liquidity purpose) will be of less than 1 year residual maturity

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However this may vary when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

The schemes shall also not undertake securities lending, short selling and shall not invest in securitised debt, ADR/GDR and foreign securities

### **Portfolio Rebalancing**

Rebalancing of the Scheme shall also be carried out whenever there is a change in the underlying index or any change due to corporate action with respect to the constituents of the underlying index within 7 days.

#### **D. Where will the scheme invest?**

The Fund would invest in stocks comprising the underlying index and track the benchmark index. The Fund may also invest in debt and money market instruments, in compliance with Regulations to meet liquidity and expense requirements.

Kotak Banking ETF will invest in Nifty Bank Index. Kotak Mahindra Bank Limited (KMBL) currently is a part of Nifty Bank Index, and to that extent Kotak Banking ETF will have investment in Equity Shares of KMBL.

#### **E. What are the investment strategies?**

The Fund would invest in stocks comprising the underlying index and track the benchmark index. Kotak Banking ETF shall invest predominantly in stocks forming part of the underlying in the same ratio as per the index to the extent possible and to that extent follows a passive investment strategy, except to the extent of meeting liquidity and expense requirements. The Fund may also invest in cash and debt/ money market instruments, in compliance with Regulations to meet liquidity and expense requirements.

#### **Risk control measures for investment strategy**

The Fund would invest not less than 95% of its corpus in stocks comprising the underlying index and endeavor to track the benchmark index. Kotak Banking ETF is an index exchange traded fund and aims to track the benchmark index, i.e. Nifty Bank Index and yield as closely as possible and therefore will follow a passive investment strategy. As the scheme has to track the benchmark index, the scheme will attempt to retain least amount of cash and will also try to avoid investment in debt/money market instruments. The Schemes' performance may be affected by a general price decline in the stock markets. The Scheme invests in the stocks comprising the index regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets.

#### **Risk mitigation measures for portfolio volatility**

Being a banking sector focused ETF; the scheme carries higher risk compared to a diversified equity scheme. However the portfolio follows the Nifty Bank Index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Also being passively managed, the scheme carries lesser risk as compared to active fund management. The fund manager would endeavour to keep cash levels at the minimal to control tracking error.

### **Risk mitigation measures for managing liquidity**

The Nifty Bank Index represents about 15.6% of the free float market capitalization of the stocks listed on NSE and 93.3% of the free float market capitalization of the stocks forming part of the Banking sector Universe as on March 31, 2016. Thus the index comprises of the most liquid bank stocks and therefore liquidity issues in the scheme are not envisaged.

### **Portfolio Turnover**

Portfolio Turnover is defined as the aggregate of purchases and sales as a percentage of the corpus during the specified period of time.

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. Kotak Banking ETF is a passively managed exchange traded open-ended index scheme. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis through Authorised participants and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty Bank Index.

### **Portfolio Turnover Ratio: 6.34**

### **Product Differentiation:**

Kotak Banking ETF is the only fund offered by Kotak Mahindra Mutual Fund which aims to provide returns that closely correspond to the total returns of stocks as represented by Nifty Bank Index.

### Investments in Derivative Instruments

As part of the Fund Management process, the Scheme, may use derivative instruments such as index futures and options, stock futures and options contracts, or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the Scheme.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the Schemes' investment objective. Notwithstanding the pricing, they can help in reducing the Tracking Error in the Schemes. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the Underlying Index and will be easy to settle compared to physical portfolio of shares representing the Underlying Index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. This settlement risk is likely to be minimized if the exchange acts as the clearing corporation and the counter party, as is the practice in the developed markets. The Schemes will not maintain any leveraged or trading positions.

### Purpose of investment in derivatives

1. The Scheme shall fully cover its positions in the derivatives market by holding underlying securities/cash or cash equivalents/option and/or obligation for acquiring underlying assets to honour the obligations contracted in the derivatives market.
2. Separate records shall be maintained for holding the cash and cash equivalents/securities for this purpose.
3. The securities held would be marked to market by the AMC to ensure full coverage of investments made in derivative products at all time.

The Scheme may use derivative instruments such as index futures, stock futures, index options, stock options, or any other derivative instruments that are permissible or may be permissible in future under applicable regulations, as would be commensurate with the investment objective of the Scheme. The manner of use of derivatives instruments is illustrated below:

### Hedging & Portfolio balancing

As part of the fund management exercise under the Scheme, the Trustee may permit the use of any of the instruments mentioned above or any other instrument that may become permissible in the future under applicable regulations. Such investment in Index futures, Stock options, Index Options, Stock Futures and other derivative instruments will be used with the objective of a) hedging the portfolio and/or b) rebalancing of the portfolio of the Scheme or c) for any other purpose as may be permitted by the Regulations from time to time.

The note below explains the concept of Index Futures and Options with an example each, for the understanding of the Unitholders.

### Index Futures / Stock Futures

Due to ease of execution and settlement, index futures are an efficient way of buying / selling an Index compared to buying / selling a portfolio of physical shares representing an Index. Index futures can be an efficient way of achieving a Scheme's investment objectives. Index futures may do away with the need for trading in individual components of the Index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the scripts. Index futures can also be helpful in reducing transaction costs and processing costs on account of ease of execution of one trade compared to several trades of shares comprising the Index and will be easy to settle compared to physical portfolio of shares representing an Index

The National Stock Exchange and the Bombay Stock Exchange introduced Index futures on Nifty (NSE-50) and Sensex (BSE 30) for three serial months. For example, in the month of Jun 2017, three futures were available i.e. June, July and September 2017, each expiring on the last working Thursday of the respective month

Let us assume the Nifty Index was 9600 as on Jun 16, 2017 and three future indices were available as under:

Month	Bid Price	Offer Price
Jun 2017	9607	9610
Jul 2017	9630	9632
Aug 2017	9645	9647

The Fund could buy an Index of Jun 2017 as on Jun 16, 2017 at an offer price of 9610. The Fund would have to pay the initial margin as regulated by the exchanges and settle its Index position with daily marked to market i.e. receive profits/pay losses on a daily basis.

The following is a hypothetical example of a typical index future trade and the associated costs compared with physical stocks.

(Amount in Rupees)

Particulars	Index Future	Actual Purchase of Stocks
Index as on Jun 16, 2017	9600	9600

<b>F. Securities Transaction Tax</b> STT for Index Futures is 0.01% STT for Spot Stocks is 0.10% (0.01% of 9700) (0.10% of 9700)	0.9700	9.7000
<b>Total Cost (A+B+C-D+E+F)</b>	<b>4.3172</b>	<b>28.9500</b>
<b>Profit</b>	<b>95.6828</b>	<b>71.0500</b>

As the above example demonstrates, the cost differential between purchasing Index Future and 50 stocks comprising Nifty (NSE-50) is a function of the carrying cost, the interest earned available to Fund Managers and the brokerage cost applicable in both cases. However, as mentioned earlier, as the Indian equity markets continues to have limitations in execution of trades due to the lack of adequate liquidity and the concept of circuit breakers, index future can allow a fund to buy all the stocks comprising the index at a nominal additional cost.

Please note that the above example is hypothetical in nature and the figures, brokerage rates etc. are assumed. In case the execution and brokerage costs on purchase of Index Futures are high and the returns on surplus funds are less, buying of index future may not be beneficial as compared to buying stocks comprising the Index. The actual return may vary based on actuals and depends on final guidelines / procedures and trading mechanism as envisaged by stock exchanges and other regulatory authorities.

#### **Use of futures**

Futures can effectively be used as a substitute for underlying stocks e.g. if the Scheme has received fresh subscriptions and if it is not immediately possible to invest the cash so received into intended stocks, the Fund Manager can buy a Future contract and subsequently replace them by actual purchase of stocks. The reverse can be done in case of redemption of Units.

The Scheme typically holds cash in order to meet sudden redemption requests. This cash holding reduces the overall returns of the Scheme. By buying futures relative to this cash holding the Scheme can effectively increase its exposure to the market while keeping the cash required to meet redemption requirement.

Futures will be used to hedge or rebalance the Portfolio or as permitted by the Regulations from time to time.

#### **Option Contracts (Stock and Index)**

In the global financial markets, particularly securities markets, options have been, for quite many years, a means of conveying rights from one party to another at a specified price on or before a specific date, at a cost, which is called Premium. The underlying instrument can be an individual stock or a stock index such as the BSE Sensex (such options being referred to as index options). Options are used widely the world over to manage risk and generate income. While managing risks, options may be preferred over futures as they provide asymmetric pay offs.

Option contracts are of two types - Call and Put; the former being the right, but not obligation, to purchase a prescribed number of shares at a specified price before or on a specific expiration date and the latter being the right, but not obligation, to sell a prescribed number of shares at a specified price before or on a specific expiration date. The specified price at which the shares are contracted to be purchased or sold is called the strike price. Options that can be exercised on or before the expiration date are called American Options, while those that can be exercised only on the expiration date are

called European Options. In India, all options are European Options. Option contracts are designated by the type of option, name of the underlying, expiry month and the strike price.

### **Example for Options**

Buying a Call Option: Let us assume that the Scheme buys a call option of ABC Ltd. with strike price of Rs. 3500, at a premium of Rs. 100. If the market price of ABC Ltd on the expiration date is more than Rs. 3500, the option will be exercised. The Scheme will earn profits once the share price crosses Rs. 3600 (Strike Price + Premium i.e. 3500+100). Suppose the price of the stock is Rs. 3800, the option will be exercised and the Scheme will buy 1 share of ABC Ltd. from the seller of the option at Rs 3500 and sell it in the market at Rs. 3800, making a profit of Rs. 200. In another scenario, if on the expiration date the stock price falls below Rs. 3500, say it touches Rs. 3000, the Scheme will choose not to exercise the option. In this case the Scheme loses the premium (Rs. 100), which will be the profit earned by the seller of the call option.

Thus for an option buyer, loss is limited to the premium that he has paid and gains are unlimited. The risk of an option writer i.e. the seller of the option, is unlimited while his gains are limited to the premiums earned.

Buying a Put Option: Let us assume that the Scheme owns shares of ABC Ltd., which are trading at Rs. 3500. The fund manager expects the price to rise to Rs. 3800 but at the same time wants to protect the downside. So, he can buy a put option at Rs. 3500 by paying a premium of, say, Rs. 100. If the stock falls to say Rs 3200 by expiry, the option becomes in-the-money by Rs. 300 and the schemes loses only the initial premium paid to buy the hedge. On the contrary, if the fund manager's view turns out to be right and the stock actually rallies to Rs. 3800, the scheme gains Rs. 300 from the stock and the hedging cost paid to buy the protection is the loss. Thus, adjusted for the hedging cost, the scheme gains Rs. 200 from the trade.

The above example is hypothetical in nature and all figures are assumed for the purpose of illustrating the use of call options in individual stocks. Similarly, analogies can be drawn to illustrate the use of put options in individual stocks, and call and put options in index.

**Note on Risk:** The risk (loss) for an option buyer is limited to the premium paid, while the risk (loss) of an option writer is unlimited, the latter's gain being limited to the premiums earned. However, in the case of the Scheme, as per current SEBI regulations, there is a blanket prohibition on writing of options (call or put).

The Scheme will use options only for the purpose of hedging and portfolio balancing or for any purpose as permitted by Regulations from time to time. Internal controls / limits for managing risks associated with options have been set up / laid down.

### **Limits for investment in derivatives instruments**

In accordance with SEBI circulars nos. DNP/D/Cir-29/2005 dated September 14, 2005, DNP/D/Cir-30/2006 dated January 20, 2006 and SEBI/DNP/D/Cir-31/2006 dated September 22, 2006, the following conditions shall apply to the Scheme's participation in the derivatives market. The investment restrictions applicable to the Scheme's participation in the derivatives market will be as prescribed or varied by SEBI or by the Trustees (subject to SEBI requirements) from time to time.

#### *i. Position limit for the Mutual Fund in equity index options contracts*

- i. The Mutual Fund position limit in all equity index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in equity index option contracts, whichever is higher, per Stock Exchange.

- ii. This limit would be applicable on open positions in all options contracts on a particular underlying index.

*ii. Position limit for the Mutual Fund in equity index futures contracts:*

- a. The Mutual Fund position limit in all equity index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest in the market in equity index futures contracts, whichever is higher, per Stock Exchange.
- b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

*iii. Additional position limit for hedging*

In addition to the position limits at point (i) and (ii) above, Mutual Fund may take exposure in equity index derivatives subject to the following limits:

- a. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
- b. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.

*iv. Position limit for the Mutual Fund for stock based derivative contracts*

The combined futures and options position limit shall be 20% of applicable MWPL

*v. Position limit for the Scheme*

The position limits for the Scheme and disclosure requirements are as follows–

- a. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of the Mutual Fund shall not exceed the higher of:
  - 1% of the free float market capitalisation (in terms of number of shares).
  - Or*
  - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
- b. This position limit shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- c. For index based contracts, the Mutual Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

As and when SEBI notifies amended limits in position limits for exchange traded derivative contracts in future, the aforesaid position limits, to the extent relevant, shall be read as if they were substituted with the SEBI amended limits.

### **Exposure Limits:**

As per SEBI circular no. Cir / IMD / DF / 11 / 2010 dated August 18, 2010 on “Review of norms for investment and disclosure by Mutual Funds in derivatives”, the limits for exposure towards derivatives are as under:

1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
2. The Scheme shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following :-
  - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
  - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
  - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
  - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.
8. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts

## **B. Fundamental attributes**

Following are the fundamental attributes of the scheme, in terms of Regulation 18 (15A) of SEBI (MF) Regulations:

1. Type of the scheme: As mentioned under the heading “Type of the Scheme”

1. A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
2. The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load

## **C. How will the scheme benchmark its performance?**

The performance of Kotak Banking ETF is benchmarked against the Nifty Bank Index. The Trustee reserves right to change benchmark in future for measuring performance of the scheme.

### **About Nifty Bank Index**

Nifty Bank Index is an index comprised of the most liquid and large capitalised Indian Banking stocks. It provides investors and market intermediaries with a benchmark that captures the capital market performance of Indian Banks. The index will have 12 stocks from the banking sector which trade on the National Stock Exchange.

### **Methodology**

Nifty Bank Index is computed using free float market capitalization method with base date of Jan 1, 2000 indexed to base value of 1000, wherein the level of the index reflects total free float market value of all the stocks in the index relative to a particular base market capitalization value. The method also takes into account constituent changes in the index and importantly corporate actions such as stock splits, rights, new issue of shares etc. without affecting the index.

### **Market Representation**

- The NIFTY Bank Index represent about 17% of the free float market capitalization of the stocks listed on NSE and 93% of the free float market capitalization of the stocks forming part of the Banking sector universe as on March 31, 2017.

- The total traded value for the last six months ending March 2017 of all the Index constituents is approximately 13% of the traded value of all stocks on the NSE and 85% of the traded value of the stocks forming part of the Banking sector universe.

#### Index Constituents and weightages as on June 19, 2017)

Security	Weight (%)
Bank Of Baroda	1.56
Canara Bank	0.71
Federal Bank Ltd.	2.02
HDFC Bank Ltd.	33.62
ICICI Bank Ltd.	18.31
IDFC Bank Limited	0.74

Kotak Mahindra Bank Ltd.	11.76
Punjab National Bank	1.08
State Bank Of India	8.96
Axis Bank Ltd	8.68
Yes Bank Ltd	5.13

#### Selection Criteria:

Selection of the index set is based on the following criteria:

- Companies ranked within top 800 based on both average daily turnover and average daily full market capitalisation based on previous six months period data are considered eligible.
- The constituents should be available for trading in the derivatives segment (Stock Futures & Options market) on NSE.
- Company's trading frequency should be at least 90% in the last six months.
- A company which comes out with a IPO will be eligible for inclusion in the index, if it fulfils the normal eligibility criteria for the index for a 3 month period instead of a 6 month period.

### C. Computation of NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

The Fund shall value its investments according to the valuation norms, as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

NAV of Units under the Scheme will be calculated as shown below:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current assets including Accrued Income} - \text{Current Liabilities and provisions including accrued expenses}}{\text{No. of Units outstanding under the Scheme/Option.}}$$

NAV for the Scheme and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto four decimals

The AMC may also calculate intra-day indicative NAV and publish the same on its website [assetmanagement.kotak.com](http://assetmanagement.kotak.com). Intra-day NAV will not have any bearing on the creation or redemption of units directly with the Fund by the AP/LI.

- Brokerage and transaction costs (including service tax) which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52. Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC.
- Expenses not exceeding of 0.30 % of daily net assets, if the new inflows from beyond top 15 cities are at least:
  - (i) 30 % of gross new inflows in the scheme; or
  - (ii) 15 % of the average assets under management (year to date) of the scheme; whichever is higher.

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis.

Provided further that expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

- Additional expenses upto 0.20% of daily net assets of the schemes, incurred towards different heads mentioned under Regulation 52 (2) and 52 (4).

**Service Tax:**

Service Tax on investment and advisory fees may be charged to the scheme in addition to the maximum limit of TER as prescribed in Regulation 52(6)(c). Service tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit of TER as per Regulation 52.

The estimates are based on an amount of Rs. 100 crores for the Scheme and will change to the extent assets are lower or higher.

The aforesaid estimates are made in good faith by the Investment Manager and are subject to change inter se among the various heads of expenses and between the Plans. It may also be noted that the total expenses of the Plans will also be subject to change within the overall limits of expenses under Regulation 52. Actual expenses under any head and / or the total expenses may be more or less than the estimates. The Investment Manager retains the right to charge the actual expenses to the Fund, however the expenses charged will not exceed the statutory limit prescribed by the Regulations. Any expenditure in excess of the limits specified in Regulation 52 shall be borne by the AMC. The differential portion of expenses if any, post charging of actual expenses will be adjusted in the investment management fee charged by the investment manager. There will be no sub limit on management fee, and it shall be within the overall TER specified above.

For the actual current expenses being charged, the investor may refer to the website of the mutual fund.

### **C. Load structure**

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of [assetmanagement.kotak.com](http://assetmanagement.kotak.com) or may call at 1800-22-2626 or your distributor.

#### **Entry Load: Nil**

In terms of SEBI Circular No. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009, no entry load will be charged on purchase / additional purchase / switch-in. The upfront commission, if any, on investment made by the investor shall be paid by the investor directly to the Distributor, based on his assessment of various factors including the service rendered by the Distributor.

#### **Exit Load: Nil**

Any exit load charged (net off Service Tax, if any) shall be credited back to the Scheme.

The Trustee reserves the right to change the load structure of the Scheme on a prospective basis. Should the Trustee, on any date, decide to change the load structure, it will be on a prospective basis and investments made by Unitholders prior to such date will continue to attract the loads applicable prior to such change.

Investors may obtain information on loads on any Business Day by calling the office of the AMC or any of the Investor Service Centers. Information on applicability of loads will also be provided in the Account Statement.

The investor is requested to check the prevailing load structure of the scheme before investing.

For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres.

Any imposition or enhancement in load shall be applicable on a prospective basis. The addendum detailing the changes may be attached to Scheme Information Documents and key information memorandum. The addendum may be circulated to all the distributors/brokers so that the same can be

attached to all Scheme Information Documents and key information memoranda already in stock. Arrangements may be made to display the addendum in the Scheme Information Document in the form of a notice in all the investor service centres and distributors/brokers office. The introduction of the exit load/ CDSC alongwith the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load/CDSC. A public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of region where the Head Office of the Mutual Fund is situated. In case of changes in load structure the addendum carrying the latest applicable load structure shall be attached to SID already in stock till it is updated.
